MORETON FARM
COLDWATER, N.Y.

ABOUT ORDERS, SHIPPING, ETC.

The prices quoted in this list do **not include cost of delivery**, which must be paid by the purchaser. We make no charge for bags, or packing.

PARCEL POST

Parcel post rates are very low to places within 150 miles of Rochester. Only 1c per pound after the first pound which is 5c.

The following table gives the rates to different parts of the country:

		Each Additional			Each Additional
	1 lb.	lb.		1 lb.	lb.
Alabama	\$.10	\$.06	Nebraska	\$.11	\$.08

When ordering seeds sent by parcel post please add enough money to the price to cover the necessary postage which we shall have to pay.

BY EXPRESS. The express rates are now a little lower than parcel post to places within 300 miles (3rd zone) on all lots weighing 50 lbs. or more, and on 25 lbs. or more to more distant points. On smaller packages parcel post is cheaper. Express charges need not be prepaid, but parcel post must be.

BY FREIGHT. Lots weighing over 100 lbs. will go much cheaper by freight than by express, but it takes longer for freight to get through. If seeds are wanted immediately and you are willing to pay the extra cost it is best to have them sent by express. The best way is to order early and have seeds sent by freight.

Please state on your order whether you wish the seeds sent by parcel post, express, or freight. If ordered by parcel post please add to the amount remitted enough to pay postage.

CONDITIONS OF SALE. We agree to assume the responsibility of the seeds and plants we sell reaching the purchaser in good condition, and should any seeds fail to grow under favorable conditions, or prove not true to name or of inferior quality, we will **REFUND THE MONEY PAID FOR THEM** or replace them without charge, but all our seeds and plants are sold on the distinct understanding and with the agreement by the purchaser that we will not be liable for any loss or damage that may occur by reason of the failure of seeds or plants to grow or to be of the variety or quality offered. We will not accept or fill orders on any other terms. JOSEPH HARRIS CO.

TERMS. Our regular terms are cash with order, less a discount of 3 per cent, except Grass seeds, Potatoes and Onion sets, on which no discount can be allowed. We should, however, be glad to open accounts with any gardeners of established credit, or who will furnish us satisfactory references. On such accounts all bills are due August 1, with no discount.

JOSEPH HARRIS CO.,
Coldwater, N. Y.

Profitable Gardening

The most successful gardeners buy the very best seeds they can get as they realize on them depends to a great extent the profit they will realize from their crops.

HARRIS SEEDS are largely raised on our own farms or under our personal supervision and the greatest care is taken to have them of the highest quality. This means they must produce the most uniform crops of the right type. No ordinary seed will do this. The seed must be bred up from one generation to another like thoroughbred live stock. That is just what we have been doing at Moreton Farm for many years during which time we have developed a good many *improved strains* of standard varieties of vegetables and also some entirely new varieties which have become very popular throughout the country.

Use Our Specialities

All the seeds we sell are as good as can be obtained anywhere, but some are *better*. These varieties have been produced by the most painstaking care in selection for many years and are, of course, better than seed grown in the ordinary way.

We advise all gardeners to try our seed of the following varieties:

- Harris' Special Crosby's Egyptian Beet
- Harris' Special Detroit Dark Red Beet
- Whipple's Early Sweet Corn, introduced by us in 1920
- Whipple's Yellow Sweet Corn, introduced by us in 1921
- Harris' New Extra Early Bantam Sweet Corn
- Harris' Perfection Cucumber
- Harris' Special Bender's Surprise Muskmelon
- Harris' Model Parsnip
- Harris' Earliest Pepper—The earliest variety
- Harris' Early Giant Pepper—The earliest *large* pepper
- Harris' Big Crop Spinach
- Harris' Special Thoroughbred Tomatoes

- Bonny Best'
- John Baer
- Harris' Success
- Stone
- Earliana
- Canadian

All these strains are *much superior* to the same varieties as usually sold by other seedsmen.

Northern Grown Seeds

It has been abundantly proved that such seeds as tomatoes, corn, peppers, melons, etc., grown in the North produce much earlier and better crops in the northern states than seed raised in the South. Earliness is often of great importance to the market grower, so he should be careful to get seeds **actually raised** in the North where the seasons are short. Many seedsmen doing business in the North get their tomato seeds from California, melon seeds from Oklahoma or Arizona, pepper seed from Georgia, and so on.

We are situated near the northern border, a few miles from Lake Ontario. Seeds raised here must mature early or get caught by frost. This fact insures early strains of such varieties as we raise here.

How Many Seeds Will Grow?

This question comes up every time any of us start to sow or plant seeds. Almost all commercial seeds contain at least a small percentage of defective or dead seeds that will not germinate. This percentage varies very much in different lots of seed, and it is hard for the gardener to tell how thick to sow in order to avoid an excessive amount of thinning, or a poor stand of plants. Carrot seed, for instance, that contains 60 per cent of live seeds must be sown considerably thicker than a lot that contains 80 per cent.

Harris' Seeds are all marked showing what percentage is of good vitality

According to Our Tests
98 per cent
 of this seed germinates

This label is put on every lot of seed (except packets) and tells you what proportion of the seeds germinated in our test of this particular lot.

The seeds are all given accurate tests either in soil or a germinating apparatus so there is no guess work about it.

We believe Harris' seeds are the only ones sold with this statement attached, with possibly one or two exceptions.

THIS PRICE LIST

The prices here quoted apply only to orders from market growers and institutions, who use seeds in considerable quantities.

This is NOT A COMPLETE CATALOGUE and does not include field seeds, grass seeds, etc., nor all the varieties of vegetable and flower seeds and plants which we sell. For these see our general catalogue which is mailed in January of each year.

ARTICHOKE

The Globe Artichoke produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia.

	Oz.	¼ lb.	lb.
Large Green Globe. The standard variety.....	\$.60	\$1.75	\$5.50

ASPARAGUS SEED

MARTHA WASHINGTON. A new rust-resistant strain originated by the U. S. Department of Agriculture at Washington. For full description see our general retail catalogue.....	.15	.45	1.50

Palmetto. Standard variety.....	.10	.25	.65

ASPARAGUS ROOTS. See page 34.

BEANS—Dwarf Wax Varieties

Of the *wax* or *yellow-podded* bush beans, the earliest varieties are *Webber Wax* with flat pods, and *Valentine Wax* with round pods. *Wardwell's Kidney Wax* is a day or two later and has very long and flat pods of high quality. This bean is quite apt to rust in wet weather and for this reason *Currie's Rust-proof* is preferred by many, although the pods are not as long and are somewhat stringy. *Sure Crop Wax* resembles *Currie's Rust-proof* but has longer pods which are stringless. *Unrivaled Wax* is very prolific and has handsome yellow pods of good length. One of the best flat podded varieties. *Pencil Pod Black Wax* is one of the best wax beans with round pods. *Hodson Wax* is late and very prolific; pods flat. *Refugee Wax* is also late and has round pods of the highest quality. It is largely used for canning.

Note—Beans in quantities of 30 lbs. or over will be sold at the 100 lb. rate. We do not sell less than 1 lb. of beans at the pound price. A pound is a pint, 15 lbs. a peck, 60 lbs. a bushel.

	Lb.	15 lbs.	100 lbs.
SURE CROP WAX. Pods 4 to 5 in. long, flat, bright yellow, stringless, and rust resistant. Similar to <i>Currie's Rust-proof</i> but matures a little later and has longer stringless pods.....	\$.30	\$2.85	\$17.00
WEBBER WAX or "Cracker Jack." The earliest wax bean with flat pods. The pods are long, straight, stringless and quite free from rust. A heavy bearer.....	.35	3.15	19.00
Valentine Wax. Extra early, round, light yellow pods.....	.35	3.15	19.00
WARDWELL'S KIDNEY WAX. Very long, flat, deep yellow pods. One of the earliest and most profitable wax beans for market...	.35	3.30	20.00
BURPEE'S NEW KIDNEY WAX. Has narrower and thicker pods than <i>Wardwell's</i> and is more prolific.....	.35	3.30	20.00
ROUND POD KIDNEY WAX. Pods 5 to 6 in. long, round, clear yellow and stringless, medium early and fairly prolific.....	.35	3.30	20.00
Brittle Wax. Same as Round Pod Kidney Wax.....	.35	3.30	20.00
PENCIL POD BLACK WAX. Pods perfectly round, nearly straight, clear yellow, stringless and of highest quality. Plant healthy and prolific. Matures early. Seed black. We consider this the best round pod wax bean.....	.35	3.15	19.00
UNRIVALED WAX. Flat pods of good length, clear yellow and of fine quality. Plant very vigorous and wonderfully productive. Matures early about the same time as <i>Wardwell's</i> . One of most profitable market beans.....	.30	2.85	17.00
Davis' White Wax. Hardy and prolific. Long, flat, yellow pods of fair quality. Matures early.....	.30	2.85	17.00
Golden Wax, Improved Rust-proof. Short pods, early.....	.30	2.85	17.00
Hodson Wax. Late, very prolific, long, straight, flat pods.....	.30	2.85	17.00
CURRIE'S RUST-PROOF BLACK WAX. Hardy and very prolific. Pods, broad, flat, deep yellow. An early and profitable market variety of fair quality.....	.30	2.85	17.00
REFUGEE WAX. Round pods of fine quality, very prolific, matures late	.35	3.00	18.00

BEANS—Dwarf Green-Podded Varieties

If your market requires a round-pod bean, *Full Measure*, *Giant Stringless Green Pod* and *Black Valentine* are the most profitable. If a flat pod is required *Bountiful* is one of the best varieties.

	Lb.	15 lbs.	100 lbs.
FULL MEASURE. Very prolific; long, round pods; stringless and of high quality, early and a very profitable market variety.	\$.35	\$3.00	\$18.00
Stringless Green Pod. Round, thick, light green pods of high quality35	3.00	18.00
GIANT STRINGLESS GREEN POD. Larger than Stringless Green Pod and fully as early. Very prolific and one of the best green-podded bush beans. Round, light green pods of high quality.35	3.15	19.00
BLACK VALENTINE. A profitable market bean. Produces immense crops of long, straight, light green pods, round as a pencil and very attractive in appearance but somewhat stringy.30	2.85	17.00
BOUNTIFUL. Very prolific. Long, flat pods of fine quality; very early. .	.30	2.85	17.00
Improved Round Pod Valentine. Extra early, long, straight, round pods, stringless.30	2.85	17.00
Refugee or 1000 to 1. Late, very prolific.30	2.70	16.00
NEW STRINGLESS REFUGEE. A stringless strain of the old Refugee	.30	2.85	17.00
Lowe's Champion. One of the Horticultural or Cranberry beans. Pods 5 in. long, flat, green, straight and stringless.35	3.75	24.00
Ruby Dwarf Horticultural. Used for shelling green. Pods light green splashed with deep red.35	3.00	18.00
FRENCH HORTICULTURAL. The best strain of dwarf Horticultural beans. More prolific and vigorous and free from disease than other kinds. Pods long, straight and highly colored. Matures a little later than Ruby Dwarf Horticultural and has taller vines. . .	.45	4.80	30.00

LIMA BEANS—Dwarf or Bush Varieties

Where beans are sold in the pods, *Fordhook* is the most popular bush Lima. The beans are of good size and very plump, and the vines are prolific. For shelling, *Burpee's Bush Lima* of the old type and *Burpee's Improved* are often used. The beans are large and flat. *Henderson's* is small, early, and very prolific.

	Lb.	15 lbs.	100 lbs.
FORDHOOK BUSH LIMA. The most popular bush Lima. Beans large, thick and deep green. The best of this class.	\$.35	\$3.75	\$24.00
Henderson's Bush Lima. Small, early and very prolific.30	3.00	18.00
BURPEE'S BUSH LIMA, Wonder Strain. Large, flat beans, medium early.35	3.75	23.00
Burpee's IMPROVED Bush Lima. Larger pods and thicker beans than the old variety and of deeper green color.35	3.75	23.00

LIMA BEANS—Pole

EARLY LEVIATHAN LIMA. Early, prolific, and pods of large size. One of the best pole varieties.35	3.45	21.00
Ideal. Very large pods often 8 in. long, medium early and prolific.35	3.45	22.00
Challenger Lima. An improved strain of Dreer's Pole Lima. Large plump beans of the "Potato" class.35	3.75	24.00

OTHER POLE BEANS

Golden Cluster Wax Long, broad, deep yellow pods of finest quality; beans white. Pods often 7 in. long and an inch broad.35	4.20	27.00
Kentucky Wonder. Long, slender, green pods of fine quality. Early and very prolific.30	2.85	17.00
Kentucky Wonder Wax. Long, flat, yellow pods of fine quality. One of the best wax pole beans.35	3.30	20.00
SCOTIA. Long, slender, green pods of the very best quality. Wonderfully prolific.35	3.90	24.00
White Dutch Runner. Very large white beans often used in place of Limas. Very prolific and early.35	4.20	25.00
Scarlet Runner. Used principally as an ornamental vine.35	4.20	25.00
Lazy Wife. Large, flat, green pods, very productive.35	3.15	19.00
KING HORTICULTURAL. Much superior to the old London Horticultural. Earlier, longer pods of brighter color and stringless. . .	.35	3.45	22.00
Speckled Cranberry of London Horticultural.35	3.30	20.00

FIELD BEANS

(Prices per 100 lbs. subject to change. Please write for price if a considerable quantity is required.)

	Lb.	15 Lbs.	100 Lbs.
Boston Marrow or White Marrowfat. Large, plump, white beans.	\$.28	\$2.40	\$14.00
ROBUST PEA BEANS. A select strain of Pea beans that is resistant to the mosaic disease and yields much more.25	2.25	13.00
Red Kidney. Large red beans, very prolific and a profitable variety. Special disease resistant strain.28	2.55	15.00
WHITE KIDNEY. Large, white, kidney-shaped beans; yields heavy crops and is of the highest quality for baking.25	2.40	14.00
IMPERIAL or PROLIFIC TREE. The beans are white, kidney-shaped, somewhat smaller than White Kidney and of fully as high quality. Yields heavy crops.28	2.55	15.00
Yellow Eye. Large plump white beans with a yellow blotch at the "eye"28	2.55	15.00

BEETS

DETROIT DARK RED—Harris' Special Strain

This strain produces beets of uniform globe shape and deep red color without light rings when cut.

This is a very superior stock, being more uniform than any other strain we have been able to find.

The seed is of our own growing and the greatest care is taken in selecting the beets to set out for seed. The consequence is that this seed produces beets with very small tops, fine tap roots, perfect globe shape and very deep color.

This seed costs twice as much to raise as ordinary seed, but the crop from it is so much superior that the seed is really worth ten times as much. Oz. 12c; $\frac{1}{4}$ lb. 35c; lb. \$1.10; 5 lbs. or more at \$1.00 per lb.

Long Season Beet

This beet is known also as "Winter Keeper" and "Coal Black."

This is a late beet not of handsome shape but of exceptionally fine quality, remaining sweet and tender even when very large.

The beets will keep all winter and retain their fine quality until spring.

The beets are half long, very dark red and have green foliage. Oz. 30c; $\frac{1}{4}$ lb. 70c; lb. \$2.25.

Crosby's Egyptian Beet HARRIS' SPECIAL STRAIN

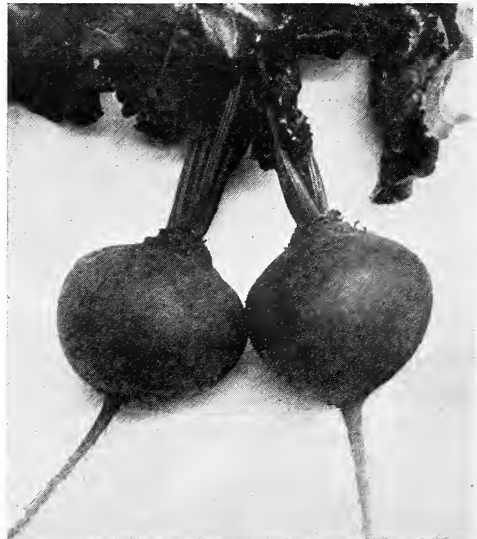

Particular gardeners who want the very finest beets both in shape and color will find this special stock the best obtainable.

The seed is of our own growing and the most careful selection has been practiced for more than fifteen years until now we have a strain that is practically "fixed" so that the beets come all alike, nearly every one a model for shape and color.

The beets are globe shape, very deep red and perfectly smooth and with very small tap roots. The tops are unusually small. This beet grows very rapidly and is ready for market earlier than any other kind we know of. It is much earlier than Detroit Dark Red and Early Blood Turnip.

This is the finest strain of Crosby's Egyptian beet obtainable no matter what price is charged for the seed.

We are glad to say that our seed this year is exceptionally fine and shows high germination. Oz. 12c; $\frac{1}{4}$ lb. 35c; lb. \$1.20; 5 lbs. or more at \$1.10 per lb.

Crosby's Egyptian Beet

"Your special strain of Crosby's Egyptian Beet is the nearest perfect in shape, color, etc., of any beet I have grown in forty years of gardening."—C. A. Baker, Milford, N. H.

"I like your seeds. Your Crosby's Egyptian Beet is especially fine—very early and of better shape than any seed of that variety that I have ever used. All other seed produced so many flat ones and were no good except for earliest bunching. Yours were good and tender as long as Detroit and uniformly dark colored all through, and in every way ahead of all other beets I ever tried."—P. D. Kremmer, Lancaster, Pa.

BEETS

For early bunching *Crosby's Egyptian* is the most popular kind; and if a really first-class strain is used there is no better beet for the purpose. Some gardeners prefer the old flat *Egyptian Blood Turnip* beet, because it makes salable beets a little quicker than Crosby's. *Early Wonder* is very similar to Crosby's Egyptian, but somewhat flatter and some gardeners claim it matures quicker. For later use *Detroit Dark Red* is excellent. For late fall and winter use it is best to sow the seed about the middle of July in the North and a little later further South. It requires about 10 lbs. of seed to sow an acre.

	Oz.	¼ lb.	lb.
CROSBY'S EGYPTIAN, Harris' Selected Strain. The finest bred strain of this beet. See description page 4. Seed of our own growing.	\$.12	\$.35	\$ 1.20
Crosby's Egyptian. Good seed but not equal to our own strain. This is the same as usually sold. 5 lbs. or more 60c per lb.10	.25	.65
EARLY WONDER. Quite similar to Crosby's Egyptian but flatter than our strain of that variety. Early and of good color. Our strain of this variety is fine. 5 lbs. or more 85c per lb.10	.25	.90
Egyptian Blood Turnip. Flatter than Crosby's, and is preferred by some for early bunching.10	.25	.75
DETROIT DARK RED, Selected Strain. Seed of our own growing, very superior stock. See description preceding page.12	.35	1.10
Detroit Dark Red. Not of our own growing but good seed, equal to any obtainable for the price. 5 lbs. or more 60c per lb.10	.25	.65
ECLIPSE. Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier.10	.25	.65
Edmund's Blood Turnip. Large flat beets. Excellent for fall use.10	.25	.65
Early Blood Turnip. A good old variety, much like Edmund's.10	.25	.65
Early Bassano. Large, flat, light-colored beets.10	.25	.70
Long Smooth Blood Red. 8 to 10 inches long and very dark red.10	.25	.65
LONG SEASON. A very late variety of fine quality.30	.70	2.25

Note—We do not sell half ounces unless the ounce price is 30c or more.
Half lbs. are furnished at the pound rate.

Mangels and Sugar Beets for Stock

	Oz.	¼ lb.	lb.
DANISH YELLOW GIANT. An immense yielder. Very large, oval, deep yellow and rich. 5 lbs. or more at 30c per lb.	\$.08	\$.15	\$.35
Golden Tankard. Oval and easily harvested; yellow flesh. The strain we offer is very fine. 5 lbs. or more at 30c per lb.08	.15	.35
NEW "HALF SUGAR" MANGEL. Intermediate between a sugar beet and mangel. Yields immense crops of beets rich in sugar. 5 lbs. or more 30c.08	.15	.35
Mammoth Long Red. Very large, long red roots of good quality. One of the best yielders and keeps well. 5 lbs. or more at 30c per lb.08	.15	.35
Giant Yellow Eckendorf. Very large yellow mangel. Blunt at the bottom, easily harvested and immense yielder. 5 lbs. or more at 30c per lb.08	.15	.35

BRUSSELS SPROUTS

Cultivation is the same as for cabbage or cauliflower. There is always a good demand for the sprouts, and they bring profitable prices. The point is to get the right seed. We are now able to offer a strain of Long Island Improved Dwarf that produces heavy yields of sprouts. Gardeners will find this a profitable crop.

Special Strain Long Island Brussels Sprouts

We are now able to offer a very fine strain of Long Island Improved Brussels Sprouts that produces a high percentage of firm, large sprouts so that the yield is high. The plants are not tall but the stems are completely covered with large and very firm sprouts. Growers will find this a profitable strain to use. **Oz. 80c; ¼ lb. \$2.50; 1 lb. \$8.00.**

DANISH IMPROVED. A good late variety that yields well if set out before the middle of June in the north.	Oz. \$.35	¼ lb. \$ 1.00	lb. \$ 3.50
LONG ISLAND IMPROVED DWARF. See description above.80	2.50	8.00

GOLDEN ACRE

The Earliest Cabbage

A wonderful fine early variety with perfectly round heads of good size and which mature a week earlier than *Jersey Wakefield*. The heads resemble Copenhagen Market of a very finely bred type. The plants are small with few leaves, but the head is of good size, weighing 5 to 6 lbs., as round as a ball, very firm and of good bright green color. Every plant produces a good head and they are all just alike.

Owing to its extreme earliness this cabbage has proved very profitable for the first early crop. $\frac{1}{4}$ oz. 30c; oz. 85c; $\frac{1}{4}$ lb. \$2.75; lb. \$10.00.

"I wish to say I have never bought better seed than we get from you. I put great confidence in your seeds and that I can't say for others I have tried." S. B. Hill, Litchfield, N. H.

Golden Acre Cabbage

Copenhagen Market Cabbage—Special Strain

This special strain of Copenhagen Market cabbage is much earlier and more uniform than the usual strain of this variety. It is the same as the Copenhagen Market used to be when first sold in this country. The heads form very early, are perfectly round, and have but few outside leaves. It is much like the new Golden Acre cabbage described above but the heads are larger and they mature a week or ten days later. Oz. 30c; $\frac{1}{4}$ lb. 90c; lb. \$3.25.

Midseason Market Cabbage

This new cabbage has proved to be the most uniform and heaviest yielding medium early variety in our trials the past two seasons. Every plant produces a fine large, round head, every one just alike. The heads are almost perfectly round, large and solid.

We highly recommend this new cabbage for market, shipping, or kraut. It will yield more tons per acre than any variety we know of. Oz. 40c; $\frac{1}{4}$ lb. \$1.20; lb. \$4.00.

CABBAGE—Early Varieties

Jersey Wakefield has long been the standard extra early cabbage, but a round head sells better in most markets and on this account the new *Golden Acre* and *Copenhagen Market* have proved more profitable. *Enkhuizen Glory* has larger heads and is a week later. *Burpee's All Head Early* has large flat heads and is a week or two later than the *Enkhuizen Glory*.

	Oz.	$\frac{1}{4}$ lb.	lb.
GOLDEN ACRE. (See above).....	\$.85	\$2.75	\$10.00
EARLY JERSEY WAKEFIELD. The standard early variety. Heads pointed, of medium size and very hard. Our strain is particularly fine, the heads being very uniform and early.....	.30	.75	2.50
Charleston Wakefield. Larger and 10 days later than Jersey Wakefield. Heads larger around and not so pointed.....	.30	.75	2.50
COPENHAGEN MARKET. Special Strain. Very early. See above	.30	.90	3.25
ENKHUIZEN GLORY. A very large, early cabbage. Heads as large as late kinds and mature as early as Charleston Wakefield. Has proved to be a most profitable variety.....	.30	.75	2.50
Burpee's All Head Early. Heads good size, deep, solid and heavy. Medium early. Used for main crop for fall market and shipping.....	.30	.75	2.50
Henderson's Early Summer. A fine early flat cabbage.....	.30	.85	2.75

CABBAGE—Late or Main Crop Varieties

For Fall market or for kraut the medium early kinds are better than the very large late kinds. *Harris' Summer Ballhead*, *Midseason Market* and *Enkhuizen Glory* are excellent.

For late fall and winter market the *Danish Ballhead* is the most profitable. The Short Stemmed strain we offer yields more than any other of the Danish type, but is not as deep green as the *Solid Emperor* or *Tall Stemmed* strain, which has smaller heads and does not yield quite as many tons per acre. The Intermediate strain is halfway between the two, having shorter stems than the *Solid Emperor* and larger heads. It is a very fine Danish Cabbage.

Savoy cabbage is often profitable for home market. Red Cabbage is profitable on rich land.

"Proved Seed." Where we offer "proved seed" it means that the seed has been held until a crop of cabbage has been raised from it so we could see just what it would produce. New seed of the 1926 crop cannot be "proved" until the fall of 1927.

Solid Emperor

Intermediate

Short Stemmed

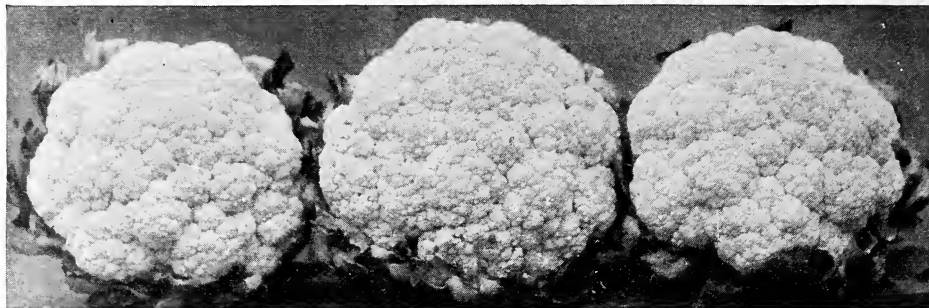

Types of Danish Ballhead Cabbages

	Oz.	¼ lb.	lb.
HARRIS' SUMMER BALLHEAD. Large, round, solid heads which mature medium early. One of the very best kinds for fall market or kraut.....	\$.30	\$.90	\$ 3.00
DANISH BALLHEAD, Solid Emperor Strain. A very fine strain of the genuine Danish Cabbage. Heads round, deep green and very hard. Stems rather long. The best keeper. Proved Seed.....	.30	.75	2.50
DANISH BALLHEAD, Intermediate. Has shorter stems and larger heads than the Solid Emperor and is of deeper green color than the Short Stemmed. A very fine strain. Proved Seed.....	.30	.85	2.75
DANISH BALLHEAD, Short Stemmed. Matures quicker than the Solid Emperor strain, has shorter stems and larger heads, but not quite as deep green color. Proved Seed.....	.30	.85	[2.75

All Seasons. Large flat heads.....	.30	.70	2.35
Volga. The heads are large, round and solid; a heavy cropper.....	.30	.70	2.35
Premium Flat Dutch. Old standard kind. Large, heavy head.....	.30	.70	2.35
Winningsstadt. Pointed heads of medium size.....	.30	.70	2.25
RED DANISH STONEHEAD. A new red cabbage much like a red Danish Ballhead. Grows to a good size and heads evenly.....	.30	.90	3.00
MAMMOTH ROCK RED. The largest red cabbage. Hard, round, deep red. One of the best red varieties for market or shipping. Proved Seed.....	.30	.90	3.00
HOLLAND EXPORT RED. A very fine red cabbage. Practically every plant makes a good head. The heads are round, very solid, and deep red all through to the center.....	.30	.90	3.00
SAVOY, Perfection Drumhead. Heads large and quite firm; color very deep green, and leaves are very much curled. Matures late and keeps all winter.....	.30	.75	2.50
SAVOY, Sutton's Best of All. Large heads, quite firm and of a light green color.....	.35	1.00	3.50

CHINESE OR CELERY CABBAGE—PE-TSAI

This Chinese cabbage has proved to be a very profitable crop for muck land. There is a good demand for it in New York and other large markets in carload lots. The seed is sown in July or August and the crop matures in eight to ten weeks.

	Oz.	¼ lb.	lb.
Pe-Tsai. Large heads. 18 to 20 in. high.....	\$.30	\$.85	\$ 2.75
Wong Bok. Short compact heads of fine quality.....	.30	.90	3.00

**Snowball, Perfected Strain
CAULIFLOWER**

Snowball, of the best strain, makes large solid heads quite early. *Danish Perfection* has more leaves than Snowball, which protects the head better. It is a week or ten days later than Snowball, and a little earlier than *Danish Giant* or *Dry Weather*, which produces large solid heads, but should be set out earlier. *Large Algiers* makes loose, flat heads of large size and of high quality, but not of the best form for market.

	¼ oz.	oz.	¼ lb.	lb.
Danish Giant Snowball or "Dry Weather." Ten days or two weeks later than Snowball and of more vigorous growth and stands drought better.....	\$.65	\$2.10	\$7.50	\$28.00
SNOWBALL, Perfected Strain. A very fine improved strain of the true Snowball type. The plant is dwarf and compact and the heads are large, solid, snow white, and with no protruding leaves when well grown under favorable conditions. Matures early but usually the best heads are obtained from plants set out rather late. The seed we offer is the very finest strain obtainable, 95 per cent of the plants make good heads. There is no use in paying more for the seed than we charge, as no better seed can be obtained at any price. This is the plain truth which anyone can prove who will take the trouble to try our seed side by side with seed costing twice as much.60	2.00	6.75	25.00
CATSKILL SNOWBALL. A fine strain of Snowball grown extensively in the Catskill Mountain region. Matures early and the heads are very compact and uniform.....	.60	2.00	6.75	25.00
DANISH PERFECTION. A strain of Snowball Cauliflower with more leaves to cover the head, which does away with tying to some extent. Heads very solid and without protruding leaves. Matures a week later than Snowball.....	.60	2.00	6.75	25.00
ERFURT EARLY DWARF, Madsen's Stock No. 3. Much like Snowball, but has somewhat shorter stems and matures a little earlier. This strain has proved the best in several trials made in New York State.....	.60	1.90	6.50	24.00
LARGE ALGIERS. Large rather loose heads, but of fine quality.....	.35	1.00	3.50	12.00

"Your seed of Erfurt No. 3 gave us a fine crop of cauliflower which brought top prices.—W. H. Graham, New Kingston, N. Y."

CRESS

Extra Fine Curled , also called "Pepper Grass".....	.12	.30	.85
WATER CRESS, Improved Broad-leaved. Much better than common Water Cress.....	.45	1.25	4.25

CORN SALAD or Fetticus

Large Round-leaved12	.35	1.25
---------------------------------	-----	-----	------

CHICORY

WITLOOF or FRENCH ENDIVE. We have a very fine strain of this popular salad plant. For description and price of seed see page 17.

CARROTS

Carrots often prove very profitable. They do best on muck or soil of that nature, although very good crops are raised on sandy loam. For late fall market the seed is usually sown in June or first of July. If small carrots for bunching are wanted the seed may be sown as late as August 1st in the North and later further south. It requires 2 to 4 lbs. of seed for an acre, depending upon how far the rows are apart.

Chantenay is considered the best variety for market or table use. The roots grow very smooth and not too long. *Danvers Half-Long* grows an inch or two longer and yields more, so is preferred when the crop is to be used for feeding stock. *Pride of Denmark* is 2 inches longer than Danvers and yields very large crops. *Coreless* or *Amsterdam Forcing* is of fine quality for table use.

Oxheart makes a nice short, thick carrot for bunching. *Early French Short Horn* is very short, but grows rapidly and is best for forcing. All of these varieties are deep orange in color.

Chantenay Danvers

Carrots of High Quality

We take special pride in our strains of Chantenay and Danvers carrots. We are especially pleased to be able to offer seed that will produce the finest carrots of these two popular varieties. Our Chantenay grows a little longer than some strains and the roots are perfectly smooth and uniform. The same is true of the Danvers which are one inch longer than Chantenay.

CHANTENAY. The most popular market variety, six inches long, stump-rooted, deep orange color and very smooth. 5 lbs. or more 90c per lb.	Oz.	¼ lb.	lb.
DANVERS' HALF LONG. Grows 6 to 7 in. long, deep orange color all through; not quite as smooth as Chantenay. A heavy cropper and valuable for stock feeding and market. 5 lbs. or more 90c per lb.	\$.12	\$.30	\$ 1.00
PRIDE OF DENMARK. A wonderfully fine carrot growing 8 to 9 in. long and 2 to 3 in. through, being practically the same size the whole length. It closely resembles the Hutchinson but has less core and deeper color. We think it a superior variety. Yields immense crops.12	.30	1.00
CORELESS or Amsterdam Forcing. The carrots grow about 5 to 6 in. long and 2 in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core, hence the name "coreless" as the small core is inconspicuous. This is a beautiful carrot for bunching or to market in bulk. 5 lbs. or more \$1.70 per lb. .	.25	.60	2.00
HUTCHINSON. A very fine carrot, 8 to 9 in. long, nearly the same size the whole length and stump-rooted. Color deep orange and quality is fine.20	.50	1.75
OXHEART or Guerande. Short, thick carrots, used for bunching and table use. Very easily pulled. About 4 inches long, deep orange yellow, and of fine quality. 5 lbs. or more 90c per lb.35	1.00	3.50
MASTODON or WHITE VOSAGE. Large, white carrot for stock feeding. Immense yielder. 8 to 10 inches long. 5 lbs. or more 60c per lb.12	.30	1.00
Long Orange. Roots a foot long, yields large crops. 5 lbs. or more 90c per lb.10	.25	.65
Early French Short Horn. For forcing. About 3 inches long; very early. .	.12	.30	1.00
	.20	.50	1.75

"With the order for seeds which I am sending I feel that a few words of appreciation are due you. I have been using your seeds for four or five years and have learned that they are absolutely dependable. While of course good quality seeds are of paramount value, the thing that appeals to me most is the excellent service that you give your customers through the pages of your catalogue. I have found that when you make a statement concerning a vegetable or flower raised from a certain seed, the statement is a fact rather than just selling talk, and to me this is worth more than the price of the seed."—W. C. Colburn, Addison, N. Y., March 11, 1925.

CELERY

A Very Fine Field of Golden Self Blanching Celery from Harris' Seed
Not a Soft or Green Stalk in the Lot

An ounce of seed will produce about 8,000 plants. It requires 20,000 plants to the acre. For very early planting the seed should be sown in February or first of March. For late crop the seed is sown in the open ground as early as possible. Great care must be taken not to cover the seed too deep. More failures to get the seed to germinate are due to this cause than any other. Two-thirds of all the celery grown is Golden Self-Blanching, or "Paris Golden," which is the same thing. This is the most profitable variety for market up to January. French's Success is one of the very best for late winter market and keeps longest.

Strains of Golden Self Blanching. There are now several distinct strains of this variety. We are offering two strains, each of which is excellent in its place.

The "Old" strain is the same as has been raised for many years. The stalks are large, rather short and form large heavy hearts. This is considered the best type for storage.

The "New" strain grows quicker and taller than the old and is best for early use and for late fall market where a tall celery is wanted.

Golden Self Blanching Celery

"Old" Strain. The old type with rather short, thick, compact stalks. This strain has been popular for many years. It is preferred by many growers for storage. Oz. 80c; $\frac{1}{4}$ lb. \$2.50; lb. \$9.00.

"New" Strain. The stalks grow very rapidly and are strong and healthy, resisting blight well. Some growers think it is too tall for late crop and storage, but for the early crop it is preferred. Oz. \$1.00; $\frac{1}{4}$ lb. \$3.50; lb. \$12.00.

A large celery grower of Fulton, N. Y., writes January 9, 1923:

"Our celery raised from your seed (New Strain) excelled anything raised in this country. We took to market some measuring three feet high without roots, weighing 42 lbs. per dozen. _____'s agent was here and bought four heads of celery from your seed to put it in their seed house to show. It was the talk of Syracuse, Fulton, and Oswego where I marketed it."—A. J. Best.

EASY BLANCHING or Sanford Superb Celery

We find this celery a first-class variety to follow Golden Self Blanching. It is of the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanched. It is superior to the Golden Self Blanching in keeping qualities. We have kept a lot of it in good shape until spring, and set it out for seed. The celery has very heavy stalks, blanches easily, and is perfectly firm and solid. The strain we offer is very carefully grown and is far superior to the California seed usually sold. We highly recommend this strain. Oz. 85c; $\frac{1}{4}$ lb. \$2.75; lb. \$10.00.

GIANT PASCAL—Special Strain

This strain of Giant Pascal is largely used in New England and is considered one of the very best for late winter market. The stalks are large, very solid and blanch pure white. This strain is far superior to the ordinary Giant Pascal. Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

Harris' Celery Seed is all marked with the per cent which germinates. The grower must know how much will grow in order to sow his seed properly.

Wonderful or Golden Plume Celery

This new celery will undoubtedly largely supersede the Golden Self Blanching when it is better known. It is of the same color and general appearance but of more vigorous, sturdy growth, forming heavy, solid stalks which blanch quickly and are of fine quality.

We have a very fine strain which will be found equal, if not superior to any sold, even at much higher prices.

We advise all growers of celery to try this strain. There are never any soft stalks and the celery is large, vigorous and healthy and keeps well in storage.

To raise celery seed in the North it is necessary to store the stalks over winter so any that are soft or that will not keep will eliminate themselves before spring. This is not true of California as there celery can stand in the field all winter and keep growing all the time, the soft stalks doing just as well as the firm ones. $\frac{1}{4}$ oz. 60c; oz. \$1.75; $\frac{1}{4}$ lb. \$6.00; lb. \$22.00.

FRENCH'S SUCCESS. One of the best green varieties for winter storage. Stalks of medium length, full heart, very tender and brittle. Blanches slowly to a pure white and keeps better than any other kind with which we are acquainted. Oz. \$1.00; $\frac{1}{4}$ lb. \$3.50; lb. \$12.00.

EMPEROR. The stalks are large, very thick, crisp and solid and of superior quality. Blanches pure white Pkt. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

White Plume. We have a very fine, pure strain of this popular celery...
Columbia. Much resembles Golden Self-Blanching in growth and appearance, but is a green celery and does not blanch so quickly and keeps longer. A valuable kind for early winter market.....

Harris' Perfection Cucumber Photograph)

CUCUMBER—Harris' Perfection

This variety has been selected for many years with the idea of getting a cucumber as near perfection as possible. The fruit is long, straight, smooth and handsome. The color is deep green with clear white rays on the blossom end. The cucumbers retain this deep green color longer than any kind we know of. The fruit averages over a foot long when matured and many reach 15 inches.

The vines are vigorous and resist blight well. This is a White Spine variety and is one of the best of this class. Our seed is so carefully bred that practically every cucumber is almost of perfect shape. See price next page.

CUCUMBER

	Oz.	¼ lb.	lb.
DAVIS' PERFECT. One of the best varieties of White Spine. Long straight fruit, tapering at both ends, very dark green and holds its color well. 5 lbs. or more \$1.15 per lb.15	.40	1.25
HARRIS' PERFECTION. See description on page 11.30	.70	2.25
Harris' Double Yield Pickle.			crop failure
CHINA. Grows 15 to 20 in. long and very slender. For description see our retail catalogue.60	1.75	6.50
Irondequoit Hothouse. For forcing. See description below.			
Earliest of All. An early strain of White Spine.15	.40	1.20
Fordhook Famous. A good variety of the White Spine class. Fruit very large, matures early and valuable on this account, but of lighter green than Davis' Perfect and Early Fortune. 5 lbs. or more \$1.15 per lb.15	.40	1.25
WOODRUFF HYBRID. We have a very fine strain of this cucumber. 5 lbs. or more \$1.45 per lb.15	.40	1.50
Arlington White Spine. Of medium length, very early and of good shape and deep green color. One of the best early varieties. 5 lbs. or more \$1.00 per lb.12	.35	1.10
EARLY FORTUNE. A very fine strain of White Spine. It is early and very productive, excellent for market and pickles. The fruit is 7 to 9 inches long, slightly tapering and of deep green color. It holds its color well when shipped. 5 lbs. or more \$1.00 per lb.12	.35	1.10
EARLY WHITE SPINE. Early and very productive. Excellent for pickles as well as for slicing. 5 lbs. or more \$1.00 per lb.12	.35	1.10
Extra Long White Spine. A little later than Early White Spine, but has longer fruit. 5 lbs. or more \$1.15 per lb.15	.40	1.25
Cumberland. Used largely for pickles.15	.40	1.35
Cool and Crisp. An old strain of white spine.15	.40	1.25
IMPROVED LONG GREEN. Very popular for both table use and for pickles. The strain we offer is very fine, the fruit being uniformly long and straight.15	.45	1.40
CHICAGO PICKLING. Very prolific and profitable for pickles. The young fruit is straight, square ended and of medium deep green color.12	.30	1.00
Perfected Jersey Pickle. Longer and more slender than Chicago and Boston Pickling. An excellent variety.12	.35	1.10
KLONDIKE. A popular White Spine variety for pickles. Dark green, straight and very prolific.12	.35	1.10
Green Prolific or Boston Pickling. Very prolific; short, bright green fruit. A profitable variety for pickles.12	.35	1.10
Early Green Cluster. Short fruit produced early and in great abundance. Of rather light green color.12	.35	1.10
Everbearing. Starts bearing early and continues a long time. Good for pickles. Fruit short and light green.15	.40	1.35
Japanese Climbing. A vigorous grower; long, smooth fruit of excellent quality.15	.45	1.50
White Wonder. The fruit is pure white when young, about 8 inches long and 2 inches through and of fine quality.20	.50	1.75
West India Gherkin. Used for pickling.20	.50	1.75
Lemon Cucumber.20

IRONDEQUOIT HOTHOUSE CUCUMBER

The gardeners around Rochester have developed a very fine hothouse cucumber that has proved the most profitable variety to raise under glass.

The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds, and in some fruit none at all.

The vines are wonderfully vigorous and very prolific.

The seed we offer was saved entirely from fruit grown under glass. **Packet of 50 seeds 60c; 100 seeds \$2.00; 500 seeds \$4.00.**

Sept. 13, 1926

"Buttercup" corn is fine and sells readily at from 20c to 50c per dozen when Bantam is slow at 15c to 30c. Whipple's New Yellow also fine, and sells readily at an advanced price. "Early Fortune" cucumber is a great favorite here and sells much better than larger sorts. Early Giant peppers great—an immense crop of fine peppers and was only two or three days behind the smaller sorts. Your seeds and prices suit me and I have been planting seeds for sixty years. Thank you for fine service and good seeds.

J. R. Tallman, Marshfield, Mass.

SWEET CORN

Harris' Extra Early Bantam

Think of getting Golden Bantam corn ten days before other growers have it to sell. That is just what you can do with this new extra early strain.

The corn is similar to the ordinary Golden Bantam, but matures *ten days earlier*. That is the whole thing in a nut shell.

This variety will undoubtedly prove the most profitable corn raised this season for those who are lucky enough to know about it and take advantage of the opportunity.

We gave small lots of seed last spring to a few gardeners to try and also sent some to the N. Y. State Experiment Station at Geneva.

The Experiment Station reports results as follows:

- Golden Bantam—average of six trials 86 days to maturity
- Whipple's Yellow 85 days to maturity
- "Extra Early Yellow" Harris' (not named) 76 days to maturity

The earliest yellow corn in the trial of 26 varieties.

The ears are 6 to 7 in. long with 8 rows of deep yellow kernels, and are just like the old strains of Golden Bantam. See picture on cover of this catalogue.

We are selling this new corn for the first time this season and no one else has any of it, so those of our customers who take advantage of this fact and plant largely of it will make some money. **Pound 55c; 6 lb. (4 qt.) \$2.75; 12 lb. (peck) \$5.00. 25 lbs. or more at 40c per lb.**

What Some Gardeners Who Had Samples of This Corn Say:

Your Harris' Extra Early Bantam corn, as I grew it came on almost two weeks earlier than Whipple's Yellow which was planted the same day.—James W. Cesan, Feeding Hills, Mass.

I wish to commend you on your selection of this truly wonderful yellow sweet corn. This seed planted same day and adjoining several white early varieties and Whipple's Yellow, picked corn with the early white corns and 12 days earlier than the Whipple's Yellow.—Gross B. Schoonmaker, Accord, N. Y.

The New Early Yellow corn that you sent us for trial last spring was very satisfactory.

The growth was even, robust and yielded a nice crop of ears that we began picking about a week before Golden Bantam which was planted the same day.—Geo. R. Warren, Adams, N. Y.

I found that Harris' New Extra Early Bantam corn is the earliest of any corn that I have grown. It is as good in flavor as Golden Bantam corn.—F. G. Bonnet, Gates, N. Y.

Early Surprise Sweet Corn

With the exception of Alpha this is the earliest corn we have grown. It matures two or three days after Alpha and *earlier* than Cory, Early Buffalo, Earliest of All and other extra early kinds.

The ears are large for so early a variety, being 5 to 6 in. long and large around with 12 rows of white kernels.

The photograph reproduced here gives a good idea of the ear. The quality is good for so early a corn, being better than Cory, Earliest of All, etc.

We are sure this new corn will prove profitable to follow Alpha, which will be ready to pick two or three days earlier. The ears of Early Surprise are larger so will sell for the highest market prices. **Lb. 35c; 12 lb. (peck) \$2.35; 25 lbs. or at 18c per lb.**

ALPHA—The Earliest Sweet Corn

Each year we try all the earliest varieties of corn we can obtain. They are all planted at the same time side by side. The Alpha for the past few years has proved the earliest by three to five days.

The ears are 5 to 6 inches long with 8 rows of large white kernels and have a white cob. The stalks are only 4 to 5 feet high.

Owing to its extreme earliness the Alpha has proved a profitable corn for the market grower. With this variety it is perfectly possible to get corn on the market 4 days to a week earlier than anyone else and get the high prices that are always paid for the first corn. **Lb. 35c; 12 lbs. (peck) \$2.35; 25 lbs. or more 18c per lb.**

Early Surprise

Alpha

BUTTERCUP SWEET CORN—A Larger and Better Bantam

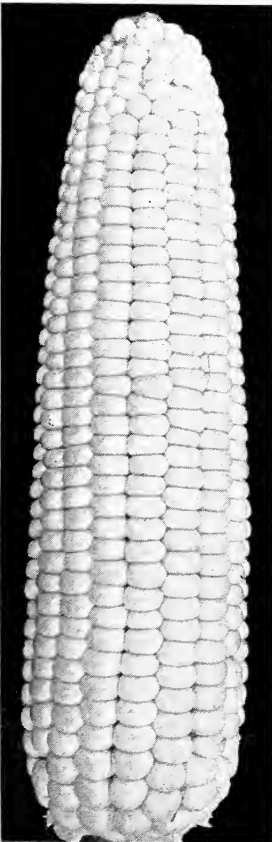

The market in many cities now demands a yellow Sweet Corn of the Golden Bantam type. The Bantam is small and does not yield well. In the Buttercup we have a corn that resembles the Bantam very closely, but has ears that are much larger and yields much more and it matures at the same time as Bantam. The quality in our opinion is fully equal to Bantam or any other corn. It evidently contains much more sugar and is therefore sweeter than other varieties.

The demand for yellow Sweet Corn is increasing every year and it always brings higher prices in the larger cities than white corn.

The Buttercup is really an improved Golden Bantam with larger ears which mature just as early. It always sells better than the small ears of Bantam.

The ears are 8 to 10 in. long and have 8 to 10 rows. Many stalks produce two ears.

We offer seed of our own raising. It is of a "thoroughbred" strain and the germination is perfect. Lb. 30c; 12 lbs. (peck) \$2.15; 25 lbs. or more, 16c per lb. EARS, \$6.00 per 100 ears.

Whipple's Early

"It is sweeter than Golden Bantam. I have ears 11 inches long."
A. W. STANTON
Union Center
N. Y.

Buttercup Sweet Corn

WHIPPLE'S EARLY SWEET CORN The Largest Early Variety

Looks like Evergreen and is as early as Cory.

Since we first introduced the corn in 1919 it has gained steadily in popularity and we have never had enough seed to supply the rapidly increasing demand. Every gardener who raises it finds it profitable.

To describe it briefly it is like Stowell's Evergreen in size and shape, but matures very early—as early as Pocahontas and Red Cory, and a few days earlier than Kendel's Early Giant, Metropolitan, Golden Bantam, etc. The quality of the corn is far superior to Evergreen, the corn being sweet, tender and delicious.

A profitable market variety—Think of putting on the market a big 16-rowed ear of corn as early as others are bringing in the small ears of other early varieties. It sells on sight and at top prices. Fully half the stalks have two large ears even when planted quite close together. The yield therefore is immense.

The ears are 7 to 8 inches long and very large around, as they have 14 to 18 rows of good sized kernels. Each ear is filled right out to the tip. The kernels are long and narrow like Evergreen.

GET HEADQUARTER SEED. We are the original introducers of this corn and have the most carefully bred stock in the country. It is earlier and more uniform than any other strain. Many other seedsmen are now offering both Whipple's Early and Whipple's Yellow, which we also introduced, but their stocks are none of them equal to our original strains, which we have bred up with the greatest care.

Lb. 30; 12 lbs. (peck) \$2.15; 25 lbs. or more 16c per lb. EARS, \$6.50 per 100 ears.

What Gardeners Say About Whipple's Early Corn

"Your Whipple's Early corn is a fine thing. It proved as early as Cory and the ears are twice as large."—Eugene Thayer, Bowie, Md.

"I was pleased with Whipple's Early Sweet Corn. Had ears 74 days from planting that weighed one and one-half lbs. each."—Fred Griffin, Hamburg, N. Y.

WHIPPLE'S NEW YELLOW SWEET CORN

Earlier than Bantam and as large as Evergreen

This is a wonderful early yellow corn that has proved very profitable to raise for market. The ears are very large, 8 to 9 inches long, having 14 to 18 rows of deep kernels. They mature ready for use two to three days earlier than Golden Bantam. The quality of the corn is very fine, but possibly not quite as sweet as Buttercup.

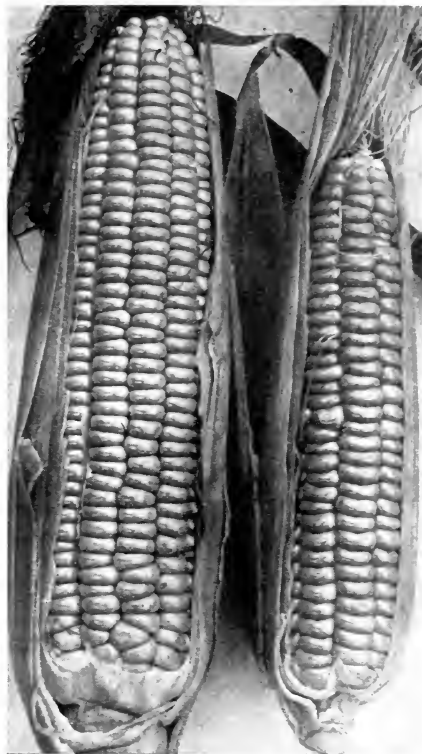

Its large size and earliness make it a most profitable market variety. The ears are of the same type as Whipple's Early and mature at about the same time. This variety was introduced by us some years ago and has become so popular and proved so profitable as a market corn that other seedsmen are offering inferior strains as Whipple's Yellow. To keep its earliness, size and quality requires the greatest care in selecting the corn from which to raise seed instead of using the whole crop as is done by most growers. The only safe way is to buy seed direct from headquarters. **Lb. 30c; 12 lbs. (peck) \$2.15; 25 lbs. or more, 16c per lb. EARS, \$7.00 per 100 ears.**

"The Whipple's Yellow corn I got of you last spring was ready ahead of Bantam and both were planted the same day. I would have made money by buying all my corn from you."
—Jack O'Brien, North Troy, N. Y.

"It may be of interest to you to state that I planted Whipple's New Yellow corn on May 19th and picked good full ears on July 24th. Quality delicious. A wonderful variety for the market gardener." H. W. Leggett, Schuylertille, N. Y.

MIMMS' HYBRID

A very valuable medium late corn. The ears are immense, often being a foot long and having 12 to 14 rows of white kernels. This corn matures a little earlier than Evergreen and has larger ears of better quality and produces more of them. **Lb. 30c; 12 lbs. (peck) \$2.15; 25 lbs. or more 16c per lb.**

Whipple's Yellow Golden Bantam
Photograph showing comparative size

SWEET CORN—General Price List

We make a specialty of high grade Sweet Corn seed. It is raised in the North and is *earlier* and far sweeter and better than western grown seed. The seed is very carefully cured and is of strong germination.

It requires about 12 lbs. of seed to plant an acre.

Note: 25 lbs. of one variety will be supplied at the 100 lb. rate. A bushel weighs 40 to 50 lbs., depending on the variety.

BANTAM EVERGREEN. A large, medium late yellow corn of fine quality. Ears nearly as large as Stowell's Evergreen but yellow like Golden Bantam and with something of the Bantam quality, being much superior to the Evergreen.	\$.28	\$2.00	\$15.00
BUTTERCUP. A large Golden Bantam. See page 14.30	2.15	16.00
HOWLING MOB. Large 12 to 14 rowed ears, medium early and of quality. A popular market corn. Our strain is very fine, being earlier than others and the ears more uniform.28	2.00	15.00
Black Mexican. Of very fine quality.30	2.15	16.00
HICKOX IMPROVED. Very large ears, longer than Evergreen and earlier than that variety and of better quality. A profitable market variety.28	1.90	14.00
EARLY MAMMOTH. Earlier than late Mammoth, with immense ears. Matures with Evergreen and has much larger ears.30	2.15	16.00
LONG ISLAND BEAUTY. A late corn with immense ears, often over a foot long and 7 to 9 inches around, 16 to 20 rows of pure white kernels that are of fine quality. A profitable late market corn.28	2.00	15.00
Burpee's White Evergreen. A very fine strain of Evergreen corn with larger ears which are very white and attractive in appearance. Matures late.25	1.80	13.00
STOWELL'S EVERGREEN. The standard late corn. We have a very fine strain grown in this neighborhood that is <i>earlier</i> and far better than western-grown seed.25	1.80	13.00
Country Gentleman. Late; small ears, of fine quality.28	2.00	15.00

NOTE. 25 lbs. or more of any kind will be supplied at the 100 lb. rate.

POP CORN

		(Peck)	
	Lb.	15 lbs.	100 lbs.
WHITE RICE. The best and most popular variety for market.	\$.25	\$ 2.10	\$12.00
Japanese Hullless. Very small ears, white corn of high quality.30	2.70	16.00
Black Diamond. Black or blue kernels of high quality.35	3.30	20.00

DANDELION

Large Thick-leaved. Much superior to the common variety.	Oz.	¼ lb.	lb.
	\$.60	\$ 1.75	\$6.50

DILL

Long Island Mammoth. Much superior to common dill. **Oz.** 10c; ¼ lb. 25c; lb. 70c

ENDIVE

Seed can be sown any time from early spring to August 1, in the Northern States. For late fall market sow in July. Sow in rows 20 to 24 inches apart and thin the plants to a foot apart. To blanch tie up the leaves with soft cord or raffia. It requires about 20 days to blanch thoroughly in cool weather. *Green Curled* is the most popular market variety. *Broad-leaved Batavian* is also in good demand. "*French Endive*" is Witloof Chicory and is quite distinct from true Endive, and its culture is entirely different.

Broad-Leaved Batavian Endive

		Oz.	¼ lb.	lb.
GREEN CURLED. Large leaves finely cut and curled.	\$.15	\$.40	\$ 1.25	
Moss Curled. Finely cut and curled; not so large as Green Curled.15	.45	1.40	
Broad-leaved Batavian (Escarolle). Broad leaves curled at the edges.15	.40	1.25	
EVER WHITE CURLED. The leaves are dense, finely cut and curled and very light green, almost white, so blanch very quickly.15	.45	1.40	

"FRENCH ENDIVE"—WITLOOF CHICORY

This is a crop that can be grown during the winter in a dark place and with very little expense. There is a growing demand for "French Endive" in the markets of all the large cities.

Directions for culture will be sent to any one interested, without charge.

Special Selected Witloof Chicory. We can now offer a very fine strain producing large compact heads often weighing over ¼ lb. each. Pkt. 10c; oz. 30c; ¼ lb. 90c; lb. \$3.25.

EGG PLANT

Black Beauty produces fruit of good size and of deep purple color, and is the most popular market variety. *New York Improved* is very similar, but the plant grows a little taller and the fruit matures a little later. In sowing Egg Plant seed care should be taken not to cover it more than ¼ in. deep, and to keep the temperature from 70 to 90.

The young plants are often injured by bugs, to prevent which it is a good plan to spray with arsenate of lead and lime even before the plants are set in the open ground. Plant in rows 3 feet apart each way.

This is a profitable crop where there is a good market. The plants do best on rather light, rich soil. In the North the seed should be sown in March and the plants set out the last of May. An ounce of seed will produce about 2,000 plants.

Black Beauty Egg Plant

BLACK BEAUTY. Large, handsome, dark purple fruit, almost black. It matures early and is the most popular variety.	Oz.	¼ lb.	lb.
<i>New York Improved (Thornless).</i> The standard variety.	\$.40	\$1.20	\$ 4.00
Extra Early Dwarf Purple. Very early and prolific, but not as large as above kinds.	.40	1.20	4.00
Early Long Purple. Fruit 10 to 12 inches long, not over 2 to 3 inches through, deep purple and of high quality. Matures early and is very prolific.	.35	1.10	3.75
Florida High Bush. Much like N. Y. Improved but the plant is taller and holds the fruit up better.	.35	1.10	3.75
	.35	1.00	3.50

FENNEL

Florence. Forms a large bulb which is excellent when cooked. .25 .60 2.00

GARLIC

The bulbs should be separated into flakes or "cloves" and set out like onion sets. Bulbs for planting: Lb. 30c; 5 lbs. or more 25c per lb.

KALE

Used principally in the late fall and winter. Sow seed in July and treat like cabbage.

- Dwarf Curled Green.** Very finely curled leaves of dwarf spreading growth. Oz. 10c; ¼ lb. 25c; lb. 80c.
- Tall Scotch Curled.** Grows two feet tall with finely curled leaves. A very hardy variety. Oz. 10c; ¼ lb. 25c; lb. 75c.
- Siberian.** Also called Sprouts. Dwarf spreading broad leaves curled only on the edges. Color blue gray. Very hardy. Oz. 10c; ¼ lb. 25c; lb. 75c.

KOHL RABI

Large Green. Used for stock feeding.	Oz.	¼ lb.	lb.
Early White Vienna. The best variety for table use, very early and can be used 10 weeks after sowing.	\$.20	\$.50	\$ 1.75
Early Purple Vienna. Differs from White Vienna only in the color of the bulb which is light purple.	.25	.60	2.00
	.25	.60	2.00

LEEK

Large American Flag. The most popular variety. .20 .50 1.75

LETTUCE

For forcing *May King* is an excellent head variety. It will stand more heat than *Big Boston*, and matures quicker. *Big Boston* is fine for cool houses and cold frames. For a curly leaf lettuce *Grand Rapids* is by far the most popular. Grows rapidly and the leaves stand upright so it can be planted close.

For summer planting in the open ground, *Iceberg*, *Unrivaled*, *Salamander*, *Holyrood Hot-Weather* and *Deacon* are good. *Big Boston* is most largely grown on muck land for both early and late crops.

Romaine or *Cos* Lettuce can be grown both in the hothouse and open ground and is in good demand in many markets. *Trianon Self-Folding* is the largest kind; the heads often being nearly a foot high. *Eclipse* is shorter and forms the head earlier. Both do best in cool weather.

HARRIS' SPECIAL BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. Heads uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this country are using Harris' *Big Boston* and find it equal if not superior, to any other stock obtainable at any price. **Oz. 15c; ¼ lb. 45c; lb. \$1.50; 5 lbs. or more \$1.40 per lb.**

	Oz.	¼ lb.	lb.
May King. A very early head lettuce for open ground or forcing	\$.15	\$.45	\$1.40
HOLYROOD HOT-WEATHER. Large, firm heads. Stands well in the summer and is very slow to run to seed15	.45	1.60
HARRIS' SPECIAL BIG BOSTON. This strain has been carefully bred for many years and is the most uniform stock we have seen. We are confident there is no better <i>Big Boston</i> grown15	.45	1.50
SALAMANDER. Large heads, light green; stands well in hot weather15	.40	1.25
DREER'S ALL HEART. Much resembles <i>Salamander</i> . A very fine summer head lettuce20	.50	1.75
UNRIVALED. Like <i>Big Boston</i> , but lighter green and without the red tinge; stands hot weather better and heads earlier. A fine variety. Called also "Long Lost," "Green Leaved <i>Big Boston</i> ," "White <i>Boston</i> ," and a dozen other names20	.50	1.75
Deacon. Large heads, smooth leaves, of finest quality15	.45	1.50
WONDERFUL or NEW YORK. Very large firm heads; almost as large as <i>Wakefield</i> cabbage. We have a very fine strain. This is the "Iceberg" lettuce grown on the West coast and shipped to our Eastern Market during the winter25	.60	2.00
ICEBERG. One of the best for open ground. Large, firm heads, curled and blistered leaves. Our strain is very fine15	.45	1.50
PRIZE HEAD. Early, crisp, loose heads of good quality; leaves curled and tinged with reddish brown20	.50	1.75
Crisp as Ice. Forms compact, medium size heads very early. The heads are tinged with deep brown and the quality is very fine30	.70	2.40
GRAND RAPIDS. Of upright growth. Curled leaves. Valuable for forcing. Our strain is very fine15	.45	1.50
OHIO GRAND RAPIDS. Grows larger and is deeper green than ordinary <i>Grand Rapids</i>15	.45	1.50
Boston Market. A small heading lettuce used for forcing20	.50	1.75
Hanson. Large heads of fair quality15	.45	1.50
Black Seeded Simpson. Loose heads of curly leaves; grows very large15	.45	1.50
Early Curled Simpson. Forms bunches of much curled leaves. Light Green15	.45	1.50
COS or ROMAINE, Trianon Self-Folding. Used for forcing and open ground. Large, long heads of fine quality20	.50	1.75
Cos, Eclipse. Forms compact heads very early. A valuable variety for forcing as well as the open ground. Every plant makes a nice firm head25	.60	2.00
Chicken. Immense leaves. Runs up rapidly. Used for green feed for chickens15	.45	1.40

"Damping Off" Controlled

We have always had a lot of trouble with plants damping off in the greenhouse and frames. "Damping off", caused by a fungus disease, can be controlled by steaming the soil, but this is a very expensive and laborious method. For the past two seasons we have found that by treating the soil with "Semesan," a new mercurial disinfectant, we have been able to absolutely stop damping off in the greenhouses, in some cases almost over night. The method is very easy and not expensive. Simply water the bed with a solution of Semesan.

For prices and further details see back cover of this catalogue.

MUSKMELON or Cantaloupe

Nearly every market wants a different muskmelon. *Rocky Ford* and *Paul Rose* are probably the most popular in many markets, and are excellent melons for shipping. *Admiral Togo* is an improved variety of this class and better than the older types. *Hearts of Gold* is another one of this class; small, firm, heavily netted and deep yellow flesh of high quality. *Osage* is in demand in some cities and is a large, handsome, round melon of high quality and good for nearby markets. *Bender's Surprise* is now the most popular of the large melons. It is very firm and keeps a long time after picking and is of the highest quality. *Emerald Gem* is small, but very early and of high quality. It is not good for shipping. *Golden Champlain* is the earliest melon grown and valuable on that account. *Fordhook* is similar but later and keeps longer.

BENDER'S SURPRISE MUSKMELON

A Grand Melon for Both Shipping and the Home Market

We have raised muskmelons for many years, but have never seen a melon quite equal to the Bender in fine flavor, size and keeping qualities combined.

The melons are round to oval in shape, ribbed and partly covered with netting. The flesh is very thick, especially so at the blossom end so that the melons rarely crack.

When ripe the melons turn a golden tint which shows through the netting and gives the fruit a very attractive appearance.

The size of the melons averages quite large, many weighing 10 lbs. and more. We have had melons that weighed 16 pounds.

A valuable point about these melons is that they will keep in good condition five or six days after picking, and actually improve in flavor during that time. The flesh is so firm and thick that the melons remain firm and in good condition much longer than other large melons of this class. For market and shipping this is an important consideration.

We offer seed of our own growing of a very fine strain.

We also offer seed grown for us which we consider as good as any obtainable, except our own growing. It is really first class.

	Oz.	¼ lb.	lb.
GOLDEN OR LAKE CHAMPLAIN. The earliest melon. Small, round, green melons with yellow flesh. Of good quality. Valuable on account of its earliness. We have a fine true stock of our own growing.....	\$.60	\$ 1.75	\$ 6.00
Seed not our own growing. A very good strain.....	.30	.90	3.00
FORDHOOK. Small round netted melons with deep yellow flesh of high quality. Ripens early. A popular market variety in many places.....	.12	.35	1.10
IRONDEQUOIT. Large, round, netted; yellow flesh. A fine strain of the well-known Surprise melon.....	.30	.70	2.25
BENDER'S SURPRISE. A grand melon. See above. Seed of our own growing.....	.60	1.75	6.50
Bender's Surprise. First class seed of a fine strain but not of our own growing.....	.30	.75	2.50
EXTRA EARLY KNIGHT. A very early melon popular in markets where known. The fruit is of medium size, oval in shape and well netted. The flesh is green and is sweet and of good flavor.....	.15	.40	1.25
HEARTS OF GOLD. A fine melon for shipping in baskets—medium in size, round and well netted. Flesh orange yellow and of high flavor. Very firm and holds up well a long time after picking.....	.15	.45	1.50
ADMIRAL TOGO. Oval, netted; flesh yellow and of finest flavor. Very prolific, medium size, slightly larger than Rocky Ford.....	.15	.45	1.50
Miller's Cream, or Osage. Oval, dark green, slightly netted, yellow flesh of the highest quality. A very fine melon and a profitable one for market.....	.15	.40	1.25

Bender's Surprise Melon

MUSKMELONS, Continued

	Oz.	¼ lb.	lb.
OSAGE, Perfected Strain. A very carefully bred strain of Osage melon which is 10 days earlier than the old type and the fruit is almost as large and is more uniform in shape and quality. This is a fine melon and will prove very profitable on account of its earliness and fine quality.....	\$.15	\$.45	\$ 1.50
EMERALD GEM. Small, round, green, slightly netted, with yellow flesh of finest flavor; very early and prolific.....	.15	.40	[1.25
PAUL ROSE. Fruit of medium size, oval, netted and very firm. Flesh orange yellow and of high quality. A valuable melon for market and shipping.....	.15	.40	1.25
ROCKY FORD (Netted Gem). Small, oval, netted, green flesh.....	.10	.25	.90
DELICIOUS GOLD-LINED ROCKY FORD. A very fine improved strain of the Rocky Ford melon. The flesh is green but has a yellow tinge about the seed cavity making it very attractive when cut.....	.15	.45	1.50
Hackensack. The standard, large netted, green flesh melon.....	.15	.40	1.20
Honey Dew. A melon that will keep two months after picking. It is shipped to eastern cities from California and the Southwest where it does well. It does not succeed here.....	.15	.45	1.50

WATERMELON

Harris' Earliest, Cole's Early, and Ice Cream or Peerless are valuable for the North because they will ripen before frost.

For places south of New York City, *Tom Watson* and *Kleckley Sweets* are better because they are longer and of high quality.

	Oz.	¼ lb.	lb.
HARRIS' EARLIEST. The earliest large melon. It is of only fair quality and is valued principally on account of its earliness.....	\$.10	\$.25	\$.70
Halbert Honey. Long, dark green, flesh red and of finest quality. Medium early.....	.10	.25	.75
COLE'S EARLY. Very early and of good quality.....	.10	.25	.65
IRISH GRAY. Long, light green, very large with a tough shell and firm bright red flesh of fine quality.....	.10	.25	.65
TOM WATSON. The most popular melon for shipping. Fruit long, medium green with lighter markings. Rind strong so the melons stand shipping well.....	.10	.20	.60
KLECKLEY SWEETS. Long, deep green, attaining a large size and of fine quality. One of the best kinds. Our Northern grown seed is superior to Southern grown. Seed saved from the best melons only.....	.10	.20	.60
ICE CREAM or PEERLESS. One of the best early varieties. Large, light green, early and of fine quality.....	.10	.25	.65
Hungarian Honey. Small, round, dark green, with bright red flesh of delicious sweetness.....	.12	.30	1.00
GREEN CITRON, or Colorado Preserving. (Green Seeds). Used for preserves.....	.10	.25	.70

MUSTARD

FORDHOOK FANCY. Finely cut and curled leaves, very ornamental..	.10	.25	.75
Giant Southern Curled. Very large curled leaves.....	.10	.25	.65
White London. The seed is used for flavoring pickles.....	.10	.18	.50

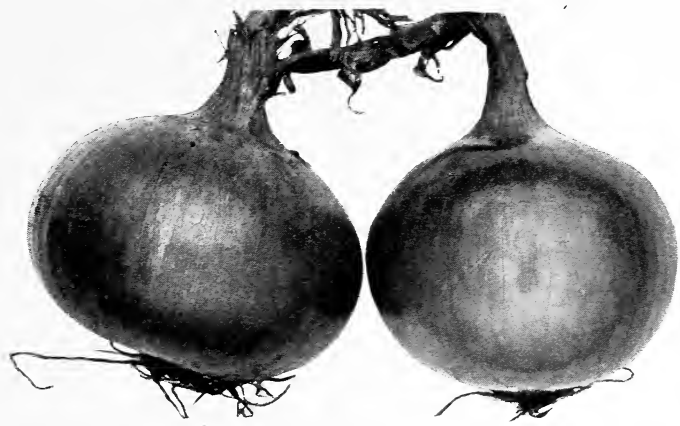

ONIONS

For market and storage a globe-shaped, yellow onion is usually preferred, although for some markets a red onion sells best. *Yellow Globe Danvers* is nearly round. *Ohio Yellow Globe* is slightly flattened on the bottom and *Southport Yellow Glob* is more pointed at the bottom, forming an oval shape rather than perfectly round. The Danvers and Ohio strains are a little earlier than the Southport and are the most popular varieties. Mountain Danvers is the earliest yellow globe onion. Round Yellow Danvers is flatter than the Globe and matures earlier. Prize-taker is larger than the Globe Danvers and a little later.

Ebenezer or "Japanese" is a flat yellow onion that keeps the year around. It is especially valuable for raising large onions early in the summer from sets.

For pickles Early Barletta is best. The seed should be sown very thick so the onions will be small and the yield heavy.

NOTE—Our Onion seed is all tested for germination before it is sent off, and the per cent that germinates is marked on the label. We should be glad to give results of our tests to any grower who is interested.

Mountain Danvers Onions

	Oz.	¼ lb.	lb.
MOUNTAIN DANVERS. A new <i>early</i> globe onion which matures two to three weeks earlier than Yellow Globe Danvers. The onions are slightly flattened, but still of good globe shape. Color deep yellow and flesh very firm.....	\$.30	\$.90	\$ 3.00
YELLOW GLOBE DANVERS. The standard yellow market variety. Our seed is grown with great care and the onions are of uniform globe shape and deep yellow color. 5 lbs. or more \$2.25 per lb.....	.30	.75	2.50
OHIO YELLOW GLOBE. A very fine strain of Yellow Globe onion especially suited to muck land. 5 lbs. or more \$2.25 per lb.....	.30	.75	2.50
ROUND YELLOW DANVERS. Earlier and flatter than Yellow Globe Danvers, but otherwise very similar.....	.25	.60	2.00
SOUTHPORT YELLOW GLOBE. Of perfect globe shape, large size. Matures a week later than Yellow Globe Danvers. 5 lbs. or more \$2.25 per lb.....	.30	.75	2.50
PRIZETAKER. Large yellow onion of very handsome globe shape and mild flavor. Does not keep as well as Danvers. Fine for fall market.....	.30	.75	2.50
SOUTHPORT RED GLOBE, Harris' Special Selected. Large, perfectly round, deep red onions; keeps well and is the best red variety. 5 lbs. or more \$2.50 per lb.....	.30	.85	2.75
LARGE RED WETHERSFIELD. Very large, deep red, flat.....	.30	.70	2.40
Southport White Globe. The largest and finest white onion.....	.40	1.20	4.00
EBENEZER OR "Japanese." A very fine yellow onion that will keep all winter and is of mild, pleasant flavor. The onions are flattened and of a light yellow color. This onion can be raised successfully from seed or sets. On account of its high quality it commands high prices where known.....	.30	.90	2.90
Early Large Red. Large, flat, red. Yields well and early.....	.30	.90	3.00
Australian Brown. Will keep the year around; matures early. The onions are flattened, of a golden brown color, and of fine quality..	.30	.70	2.40
WHITE PORTUGAL, or SILVER SKIN. Flat, white onion of mild flavor, early. Excellent for pickling.....	.30	.85	2.75
EXTRA EARLY BARLETTA. The best small white onion for pickling. Our seed is the real Barletta onion, producing very small round, white onions that mature very early.....	.30	.75	2.50
GIANT GIBRALTAR. This is the largest Spanish onion which is sold in our markets. The onions are almost perfectly round or globe shaped, bright yellow and of very mild flavor. They grow very large, often weighing a pound or more. Matures rather late and should have plenty of room to develop. Genuine imported seed...	.30	.90	3.00
Mammoth Silver King. Very large white, flat onion used principally for bunching while green. Seed sown in the spring will make large bunching onions in July and August.....	.30	.75	2.50

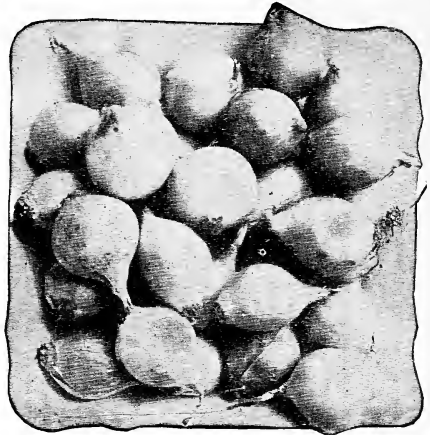

"I have bought my seed of you for the past two seasons and they have proved highly satisfactory. The onions have been better size and far ahead in color of any around here."—Mr. Clyde L. Lowe, Hudson, Mich.

ONION SETS

White sets make the whitest and most attractive bunching onions. The Yellow sets, especially the Ebenezer, are best to produce large dry onions for early use.

	Qt. (1 lb.)	Pk. (8 lbs.)	Bu. (32 lbs.)
Yellow Sets. Sound and clean.....	\$.25	\$1.15	\$ 3.90
White Sets. Silverskin...	.30	1.40	5.00
Ebenezer or "Japanese" Sets25	1.25	4.00

NOTE—Prices subject to change. Please write for price if a considerable quantity is required.

OKRA or GUMBO

	Oz.	¼ lb.	lb.
White Velvet. Smooth light green pods of medium length.....	\$.10	\$.18	\$.50
Perkins' Long-pod. Long green pods of the best quality.....	.10	.18	.50

"JAPANESE" or EBENEZER ONION SETS

These sets will produce large ripe onions in July or August when they always command high prices. These onions will keep all winter without sprouting. A very small percentage bolt to seed when raised from sets. In fact we have known a good many onions that refused to throw out a seed stalk even the second year after being raised from sets.

Gardeners find it much more profitable to raise onions from these sets than from seed unless they have exceptionally good onion land.

At the present price of labor it will cost very little more to raise onions from sets than from seed, and the crop is usually worth more. Qt. (1 lb.) 25c; peck (8 lbs.) 1.25; bu. (32 lbs.) \$4.00. Prices of larger lots given on application.

PARSNIPS

Harris' Model Parsnip—Every One a Model. Photographed Exactly as Dug

HARRIS' MODEL PARSNIP. We have been improving the old Hollow Crown parsnip by careful selection for some years until we have obtained a very fine strain which we call "Harris' Model." The shape is shown in the photograph above.

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance.

Our seed is of our own growing from transplanted and very carefully selected roots and it will be found far superior to the seed usually sold.

	Oz.	¼ lb.	lb.
Harris' Model	\$.12	\$.35	\$ 1.10
Long Hollow Crown. Long, smooth roots.....	.10	.20	.60

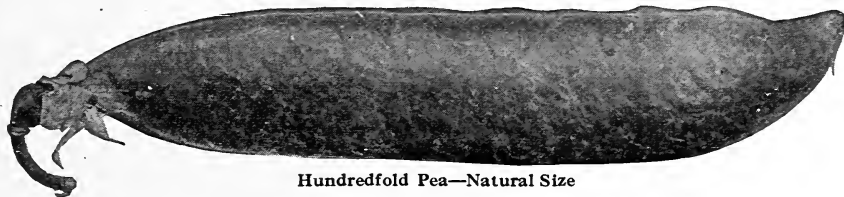

PARSLEY

	Oz.	¼ lb.	lb.
DWARF PERFECTION. The finest parsley we have ever seen. Deep green and very finely curled.	\$.12	\$.30	\$.90
Champion, or Triple Moss Curled. Finely curled deep green leaves.10	.25	.65
Plain. Leaves not curled.10	.20	.60
Turnip-rooted or Hamburg. Form large roots that are cooked as a vegetable. We have a fine variety called "Thick Sugar" with smooth white roots of the best quality. Far superior to the common variety in both shape and quality.10	.20	.60

PEAS

The very earliest peas like Alaska and Surprise have small pods, but Thomas Laxton, Acquisition and Gradus are only three or four days later and have much larger pods. Laxtonian and Hundredfold are two or three days later than Gradus and have still larger pods. Laxton's Progress is an improved Hundredfold with larger pods. Blue Bantam is the same as Hundredfold. Little Marvel matures a day or two earlier than Sutton's Excelsior and produces wonderful crops, but the pods are not as large.

Duke of Albany and Alderman are strains of Telephone, but are better than the old type, having darker colored peas and larger pods. Prizewinner is a little later than Telephone, has short heavy vines and very large, deep green pods, and is one of the best late varieties.

Hundredfold Pea—Natural Size

PEAS—Early Varieties

NOTE—We are now selling peas by weight only. A pound is about 1 pint, 15 lbs. equal a peck and 56 lbs. a bushel measure. 30 lbs. or more of one variety will be supplied at the 100 lb. rate.

	lb.	15 lbs.	56 lbs. (Bu.)	100 lbs.
Alaska. Very early, small pods. 2 ft.	\$.30	\$2.70	\$ 8.96	\$16.00
ACQUISITION. A very profitable variety. Pods as large as Gradus and earlier, very hardy and can be sown earlier than safe to sow other kinds.35	3.00	10.08	18.00
Surprise or Eclipse. Very early and of fine quality. Small pods. Very prolific. 2 ft.35	3.00	10.08	18.00
First and Best. Extra early; pods three inches long, well filled. This is the earliest variety. 2 ft.30	2.70	8.96	16.00
THOMAS LAXTON. Very early; medium-sized pods. One of the most profitable market peas. Our stock is very fine.30	2.85	9.52	17.00
GRADUS, or Prosperity. Large pods, early and highest quality	.35	3.00	10.08	18.00
LAXTON'S PROGRESS. A new pea with pods a little larger than Laxtonian and a day or two earlier.40	4.50	15.68	28.00
LAXTONIAN. (Pioneer). A dwarf pea with pods nearly as large as Telephone and matures as early as Little Gem. Pods and peas dark green. 18 in. high.35	3.90	13.44	24.00
HUNDREDFOLD or Blue Bantam. Much like Laxtonian, of the best strains. Vines very strong and sturdy, 16 to 18 in. high. Pods 4 in. long and deep green. A very fine early dwarf pea.35	3.90	13.44	24.00
LITTLE MARVEL. Very prolific, matures a day or two later than Nott's Excelsior and has pods a little larger; vines stocky. 15 in. high.			Crop failed.	
Nott's Excelsior. Early dwarf vines, medium-sized pods; one of the best early dwarf peas. 15 in. high.30	2.70	8.96	16.00
SUTTON'S EXCELSIOR. Larger pods than Nott's and only a day or two later. A valuable variety. 18 in.			Crop failed.	
McLean's Little Gem. The standard early dwarf pea. 15 in. high	.30	2.70	8.96	16.00
American Wonder. Very dwarf, early, 15 in. high.30	2.70	8.96	16.00

PEAS—Medium and Late Varieties

	lb.	15 lbs.	(Bu.) 56 lbs.	100 lbs.
SENATOR. Pods 5 in. long and closely filled with deep green peas which are of very fine quality, vines 2 ft. high....	\$.35	\$3.00	\$10.08	\$18.00
LINCOLN. Long narrow pods completely filled with 9 to 10 large deep green peas; vines 2½ ft. and produce immense crops.....	.30	2.85	9.52	17.00

"I enclose snapshot of peas raised from your seed. We sowed 15 lbs. of Alderman and sold 50 bu. besides what we used in the family. We think they are the best pea out."—A. L. Dunock, Somers, Conn.

"HARRIS' EARLIEST" SWEET PEPPER

The Earliest and most Prolific Sweet Pepper

Gardeners who have trouble getting peppers that will produce a good crop of fruit early enough for the Northern States should try **Harris' Earliest**.

This is by far the **earliest** sweet pepper we know of. The fruit is of good size, resembling the Large Bell or Bull-Nose, but unlike that variety is mild and sweet. The peppers are bright red when ripe and very firm.

The plants are of dwarf, compact growth and are **literally covered with fruit**, there being often a dozen large ripe peppers on a plant at one time and many green ones.

They can be set out closer together than other varieties and an immense number of peppers are produced on a small amount of land.

It always produces lots of fruit and is so early that the fruit gets ripe long before frost. With this new kind you can get peppers on the market before any other growers have them.

We are improving the size and shape of this pepper every year. It is now **much larger** and of better shape than it was two or three years ago.

Some gardeners tell us that we do not say enough about this pepper. They say they get more peppers from 100 plants than from 500 of any other kind that bears sweet peppers. Seed of our own growing. ¼ oz. 25c; oz. 85c; ¼ lb. \$2.75; lb. \$10.00.

KEEPING CROP RECORDS

We have prepared a Crop Record Book which will assist gardeners in keeping track of their crops. This booklet will be sent free to any grower upon request.

Harris' Early Giant Pepper

HARRIS' EARLY GIANT PEPPER

The Earliest and Most Prolific *Large* Pepper

We have at last developed a **very large** pepper that is not only early but yields large numbers of peppers on every plant. Hitherto all large peppers have been late and did not yield well in the North. By careful breeding a really remarkable result has been attained.

Harris' Early Giant has fruit that stands 5 in. high and 4 in. across. 21 peppers fill a 14 qt. basket and 45 completely fill a bushel crate. It is larger than Ruby King and Giant Crimson and fully as large as Chinese Giant, and three or four weeks earlier and much more prolific.

On a great many plants there are 10 to 12 large peppers and 8 or 10 smaller ones at one time. The yield is, therefore, immense.

Harris' Earliest is undoubtedly the earliest variety but the Harris' Early Giant is much larger and only a week or two later. The plants grow 18 in. to 2 ft. tall and produce such a large number of big peppers that there is hardly room for them on the plant.

The price of seed may seem a little high compared with older varieties, but when it is realized that it costs only \$2.00 more to get seed enough for an acre, it seems absurd to consider this small expense as the increase in yield and earliness is worth at least \$100.00 per acre. $\frac{1}{4}$ oz. 45c; oz. \$1.25; $\frac{1}{4}$ lb. \$4.00; lb. \$15.00.

"I saw your Early Giant pepper at Morse's trial grounds and will want some seed. It proved to be the earliest and most uniform of any, and just right for size."

NORTHERN GROWN PEPPER SEED

It makes a wonderful difference where pepper seed is grown. Seed grown in the North where the seasons are short produce peppers *much earlier* than seed grown further South. For northern localities like New York State and New England it is of the greatest importance to get northern grown seed. Not only will such seed produce peppers earlier but the crop is larger also.

Our seed of Harris Early Giant and Harris Earliest peppers is grown here in the northern part of western New York on our own farm. Seed of these varieties offered by other dealers is often grown much farther south.

PEPPERS—General Price List

Giant Crimson, Magnum Dulce and Chinese Giant are very large peppers, but do not bear as well as the varieties with smaller fruit, such as Neapolitan and Harris' Earliest which are also earlier. Giant Crimson is more prolific and earlier than Chinese Giant with just as large fruit. Harris' Early Giant is as large and much earlier. Ruby King and Royal King produce well and are very large peppers, but somewhat late for the northern parts of the country.

Of the pungent or "hot" peppers, Giant Cayenne is one of the best.

Connecticut Field, or Big Tom. The common yellow field pumpkin10	.20	.60

"Early Giant Peppers grew an immense crop of fine peppers and was only two or three days behind the smaller sorts. Your seeds and prices suit me and I have been planting seeds for sixty years."—J. R. Tallman, Marshfield, Mass., Sept. 10, 1926.

"Twelve years ago some people who had used your seeds for twenty-five years said they were good. I have used them ever since and found them the same."—E. J. Rulifson, Bergen, N. Y., May 4, 1926.

POTATOES

About Shipping.—The potatoes are shipped in sacks holding 150 pounds (2½ bu.) or barrels holding 180 lbs. (3 bu.). We can usually ship safely by the 25th of March, but not before, except to the Southern States.

If seeds and potatoes are ordered, please state on the order whether the seeds are to be held to go with the potatoes, or to be sent at once, and the potatoes later when it is safe to ship them. We cannot safely ship potatoes until the last of March.

Prices Subject to Change.—The prices here quoted are subject to changes of the market and to our acceptance on receipt of order. Lowest prices will be quoted by letter any time. Please state the kinds you are interested in.

Varieties.—Of the early kinds, Early Six Weeks, and Early Ohio are the earliest and are light pink in color. Irish Cobbler is a very early white potato. Bovee is medium early and a heavy yielder. Green Mountain is medium late and of finest quality. Golden Rural or Rural Russet is one of the best late varieties.

	Bu.	Sack 150 lbs.
IRISH COBLER. The most popular round white early potato. Our stock is very fine, being pure, true to name, and practically free from disease. . . .	\$3.00	\$7.00
Early Ohio. The standard extra early potato. Light pink, nearly round with blunt ends. . . .	3.00	7.00
Early Six Weeks. Of the Early Ohio class and resembles that variety closely. One of the very best extra early kinds. . . .	3.25	7.50
BOVEE. One of the best medium early varieties. While not quite as Early as Early Ohio and Six Weeks, yet it yields so much more that gardeners often find it more profitable. The potatoes are oblong, smooth, and white with light pink shading in spots. We offer <i>certified</i> seed of high quality. . . .	3.00	7.00
GREEN MOUNTAIN. A standard late potato of finest quality. Yields well in many localities, notably in New England. We offer <i>certified</i> seed of highest quality. . . .	2.90	6.50
No. 9 or Heavy Weight. One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease. Grown from certified seed. . . .	2.65	6.00
GOLDEN RURAL or RURAL RUSSET. One of the very best potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome round, white potatoes. We think larger crops can be raised with this variety than any other kind with which we are acquainted. . . .	2.65	6.00

Potatoes in Barrels.—We can ship potatoes in wooden barrels holding 3 bu. (180 lbs.) if so ordered. The price of a barrel is three times the single bushel price. For example, if the bushel price is \$3.00, a barrel would be \$9.00.

RADISH

For forcing, Early Scarlet Globe and Harris' Special Scarlet Forcing are the most popular. The former is oval in shape, while the latter is round. Both grow very rapidly. Crimson Giant Globe is similar to Early Scarlet Globe, but grows larger and requires a little more time to mature.

For the open ground, Early Scarlet Globe is excellent. Earliest Scarlet White Tipped is very handsome and resembles French Breakfast, which is more oval in shape. Icicle is a fine long, white radish, smooth and of fine quality.

Philadelphia White Box is round, grows rapidly and is excellent for forcing and open ground. White Strasburg, Giant White Stuttgart and Delicacy are large, white radishes for summer and fall use.

Winter radishes are sown in July or August and used in the fall and winter. Chinese Rose is the best red variety. Long Black Spanish is also of fine quality.

	Oz.	¼ lb.	lb.
Earliest Scarlet Globe Short-leaf. Called also "Red Rocket," "20 Days" and "Startle." Oval shaped, of very rapid growth and good for forcing. . . .	\$.12	\$.30	\$1.00
EARLY SCARLET GLOBE, Special Strain. The most popular variety for forcing and outdoor culture. Oval to round in shape, very bright red, flesh white, firm and crisp. The strain we offer is especially good for forcing as the tops are small, the radishes clear scarlet without purple tinge, and grow very rapidly, being ready to pull in about 20 days. 10 lbs. or more 75c per lb.10	.25	.80
Early Scarlet Globe. As usually sold. Good, but not quite equal to our special strain for greenhouse use. . . . 10 lbs. or more 60c per lb.10	.25	.65
CRIMSON GIANT GLOBE. Very large forcing radish. Not so early as Early Scarlet Globe, but larger and stands longer without becoming pithy.12	.30	.85

SORREL

Improved Broad-Leaved.15	.40	1.25
-------------------------------------	-----	-----	------

Harris' Big Crop Spinach

Introduced by us in 1925.

This new variety is the **earliest** and **largest** spinach we have ever seen. It grows very rapidly and so is large enough to cut sooner than other kinds. The leaves are slightly blistered, very broad and fairly thick. Under favorable conditions the leaves often grow a foot long and half as broad.

Gardeners will find this a profitable early variety for spring sowing. It will yield immense crops and can be cut earlier than other kinds. **Oz. 10c; ¼ lb. 20c; lb. 60c; 10 lbs. or more, 55c per lb.**

Harris' Big Crop Spinach

"I cut 362 bu. of your Big Crop Spinach from 10 lbs. of seed purchased of you this spring" Charles Claey's, Barnard, N. Y.

King of Denmark Spinach

Named and Introduced by us in 1920

Those who have tried this new Spinach know it is a wonderful improvement over all other kinds. It not only grows fast and produces a large yield, but it stands **two weeks** longer before running to seed. The leaves are broad, heavy, dark green, and somewhat blistered like a Savoy cabbage. The remarkable thing about it is that it stands so long before putting up a seed stalk. This is a great advantage to the gardener, as he does not have to sell the whole crop within a few days as with other kinds.

The King of Denmark spinach resembles Long Season, but grows **much larger** than that variety and stands **ten days or two weeks** longer. **Oz. 8c; ¼ lb. 15c; lb. 35c; 10 lbs. or more 32c per lb.**

New LONG STANDING Bloomsdale Savoy Leaf Spinach

This new strain of Savoy Leaf spinach is a great improvement over the old type as it stands much longer before running to seed. The leaves are dark green and much curled and blistered. We highly recommend this variety, especially for fall sowing. **Oz. 8c; ¼ lb. 15c; lb. 45c; 10 lbs. or more 40c per lb.**

SPINACH

Norfolk or Bloomsdale Savoy-leaf has deep green blistered leaves, but runs to seed very quickly. The new *Long Standing* Bloomsdale or Savoy is much better. It is very hardy and is used principally for fall sowing for which it is one of the best kinds. The new Blight Resistant strain of Norfolk Savoy-leaf is valuable where spinach blight is trouble-some. Long Season has leaves similar to Savoy-leaf and stands much longer. King of Denmark is larger, stands up better and remains without running to seed much longer. Viroflay is a very rapid grower and has long, somewhat pointed leaves not as thick as Eskimo, which does not grow quite so rapidly, but stands a longer time and is darker green. Giant Crumpled Leaf grows very rapidly, has large broad round leaves, somewhat crumpled or blistered and is one of the best early kinds for spring sowing. The new "Big Crop" has still larger leaves but not as crumpled, and grows very rapidly. Victoria has round, very dark green leaves and stands well without running to seed. For wintering over, we recommend Eskimo, Norfolk Savoy-leaf and Victoria, all of which are hardy.

	lb.	10 lbs.
HARRIS' BIG CROP. See description on preceding page.	\$.60	\$.55
KING OF DENMARK. Stands longer in hot weather than any other kind.35	.32
ESKIMO or GIANT THICK-LEAVED. An improved variety with very large, thick, dark green leaves; grows rapidly and stands well without running to seed. Hardy and an excellent kind for wintering over.30	.25
VICTORIA. Round, thick leaves, deep green and blistered. An excellent kind for spring sowing.35	.30
Long Season. Very deep green, round thick leaves. Stands a long time without running to seed.35	.30
GIANT CRUMPLED LEAF. Very large rounded leaves, blistered or crumpled. Grows rapidly and yields large crops of very fine quality.35	.30
NORFOLK SAVOY-LEAF. Round, blistered leaves. One of the best for fall sowing.30	.25
Long Standing Bloomsdale or Savoy Leaf. See description above.45	.40
BLIGHT RESISTANT SAVOY-LEAF. A strain of Norfolk Savoy-leaf that is resistant to the leaf blight or "yellows" which often ruin whole crops of spinach in some localities.30	.25
Viroflay. Very large pointed leaves. Rapid grower and comes early.30	.25
Long Standing. Round, deep green leaves.30	.25
NEW ZEALAND. Not a true spinach. Valuable for summer.oz. 10c	.55	.50

SWISS CHARD or SPINACH BEET

The Silver Leaf has smooth, light-green leaves with very broad, white ribs and is the most popular variety for market. Lucullus grows very large and has crinkled leaves. Both varieties are quite hardy and will survive the winter if given some protection.

	Oz.	¼ lb.	lb.
Silver Leaf. Large, green leaves with white ribs.	\$.10	\$.25	\$.70
LUCULLUS. Very large crinkled, deep green leaves. Grows larger and is of better quality than the old kinds.10	.25	.75

OUR GENERAL RETAIL CATALOGUE

This price list does not include all the seeds and plants we sell. Our general catalogue for 1927 will be issued in January at which time it will be mailed to all our customers and to others who ask for it. If you do not get a copy, it would give us pleasure to send it if you will notify us. The catalogue contains more detailed description of varieties than it is possible to give in this price list.

SQUASH—Summer Varieties

The Giant Crookneck usually sells best in market, although Mammoth White Bush Scallop (called "Cymling" in the South) is in demand in many cities. The fruit is saucer-shaped and scalloped around the edge.

Italian Vegetable Marrow, called also "Cocozelle," is now in much demand. The fruit is long, mottled, dark and light green, and grows on a bushy plant without runners. It is used when half grown.

	Oz.	¼ lb.	lb.
Early Bush Crookneck. Most popular summer squash. Very early.	\$.12	\$.30	\$1.00
GIANT BUSH CROOKNECK. Larger than the old Bush Crookneck and equally early. Our strain is very fine.12	.35	1.10
Mammoth White Bush Scallop. Large, flat, white fruit.12	.30	.95
Early Yellow Bush Scallop. Similar to the White, except in color.12	.30	1.00
ITALIAN VEGETABLE MARROW (Cocozelle). Long, mottled green fruit of high quality.15	.40	1.25

SQUASH—Fall and Winter Varieties

Boston Marrow and Prolific Marrow are first to ripen and are excellent for canning and pies.

The Improved Warted Hubbard grows larger than the true Hubbard, and the shell is covered with lumps or "warts" making a squash that sells well in market, but we do not think the quality is quite as good as the true old Hubbard.

Delicious and Quality are both finer squashes than Hubbard, but do not yield quite as much and are profitable for market only where there is a demand for squash of high quality rather than size and appearance.

	Oz.	¼ lb.	lb.
QUALITY. A new winter squash, small in size, but of very fine quality—better than any squash we know of.	\$.30	\$.75	\$2.50
Boston Marrow. Popular fall squash, deep orange color. Used principally for canning and pies.10	.25	.75
Prolific or Orange Marrow. Very similar to above, but earlier. A valuable squash for canning or pies.10	.25	.80
Essex Hybrid (Turban). Large, flattened at ends. Color terra cotta red. Thick flesh of high quality.15	.45	1.40
DELICIOUS. Smaller than Hubbard, but of finer quality.12	.35	1.10
HUBBARD—True. Dark green fruit of high quality. We have a very fine true strain of this variety.12	.30	.90
IMPROVED WARTED HUBBARD. Larger and more warted than the true Hubbard.12	.30	.95
Golden Hubbard. Deep orange yellow.12	.30	1.00
BLUE HUBBARD. A very fine large squash of the Hubbard type but the color is blue-gray. The shell is very hard and the squash keep a long time.15	.45	1.50

HARRIS' THOROUGHbred TOMATOES

We have for years made a special point of raising high quality tomato seed. We raise the seed on our own farm and practice the most careful breeding methods to improve the strains.

BONNY BEST TOMATO

Our selected strain has very smooth, handsome, bright red fruit of good size and well colored. Ripens almost as early as Earliana.

The fruit does not often crack and there are practically no irregular or "rough" specimens.

We are sure there is no finer strain of Bonny Best tomato than the seed we are offering this season. It was saved from very carefully bred plants and practically every fruit was of perfect color and good shape. Oz. 50c; ¼ lb. \$1.50; lb. \$4.75.

HARRIS' SUCCESS TOMATO

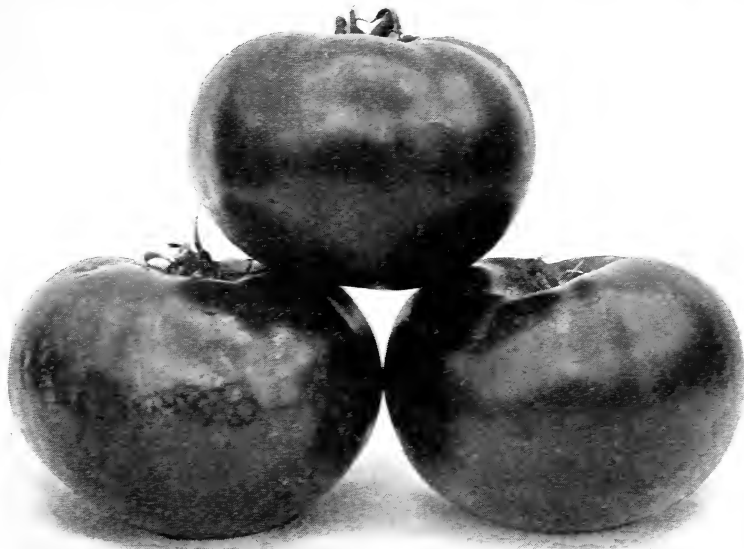

The fruit is practically perfect—large, well colored, smooth, firm, and of exceptionally fine quality, being quite free from acidity when cooked. In addition it yields more than any other kind we raise. Ripens almost as early as John Baer and Bonny Best and is larger, more solid and yields more. Oz. 50c; ¼ lb. \$1.50; lb. \$4.75.

"Your Bonny Best and Success tomatoes are without rivals on our markets, as is also Harris' Early Giant Pepper"—Delbert Bungart, Birmingham, Mich.

"We used several thousand of your untransplanted tomato plants last year with excellent results. We really feel that it is cheaper and more satisfactory than raising them in hotbeds."—Wm. J. Alberts, Pittsburgh, Pa.

Marvana Tomato

A new strain of Earliana obtained by the U. S. Department of Agriculture. It is blight resistant and the vines are more vigorous and stay green longer than ordinary Earliana. The fruit is very smooth and well colored and ripens very early. Our seed is of our own growing and raised from seed sent us by the U. S. Department of Agriculture. We recommend this variety to all who have trouble with early tomatoes blighting before the crop is ripe. Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

Canadian Tomatoes

The Earliest Tomato—CANADIAN

A new strain of Earliana tomato which originated at the Ontario Agricultural Experiment Station in Canada. In our trials it has proved to be *earlier* than any other tomato we have ever grown. The fruit is like Earliana in every respect, but not quite as smooth as our own strain of that variety.

Those who want the very *earliest* tomatoes should try this new strain. It will beat others by a week. Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00.

"Your Canadian Tomato yielded heaviest early pickings of the four early strains of tomatoes tried by us this year."—Lewis E. Avery, N. Syracuse, N. Y., R. D. No. 1.

Harris' Special EXTRA EARLY Strain of EARLIANA TOMATO

We are quite sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the *smoothest* and *best colored* stock of Earliana obtainable. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

This special strain of Earliana is not only extremely early, but the fruit is *perfectly smooth*, very solid and firm and is well colored right up to the stem.

Gardeners find this a most profitable tomato to raise. The early crop brings high prices and the fruit that ripens later is of such good shape and color that it brings almost as much as the later varieties.

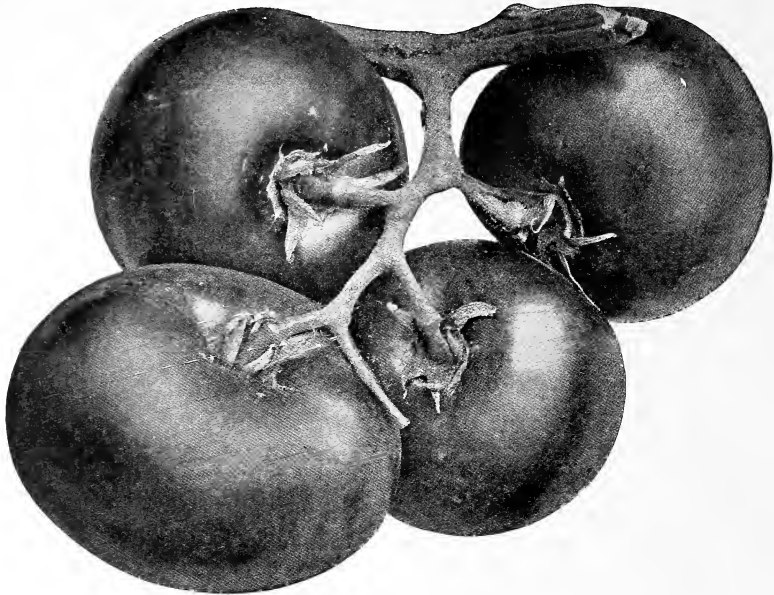

We offer seed of our own growing at Moreton Farm. It is Northern grown as we are on the north border near Lake Ontario. Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

Over \$1,000.00 per acre.

"I was well pleased with your Earliana tomatoes as they were very early and the first fruit was nice and smooth. The first pickings sold for 25c per lb. wholesale and even the last of them I realized as much for as the other growers did for other varieties. I realized \$518.00 out of a half acre. Never sold the like in this section of the country."—George T. Harris, Belleville, Ont.

"I had a test of different strains of Earliana last year and yours was by far the best, beating the Langston strain in a big way."—D. C. Paschke, North East, Pa.

"I have used your strain of Earliana tomato for five years in competition with several others and can find none to compare with it. It comes earlier and the later ones round up nicely for the factory men."—W. T. Chaffo, Marion Station, Md.

John Baer Tomato

JOHN BAER TOMATO

We have improved our stock of John Baer so that it is now even better than when first introduced.

The fruit is large, smooth, deep red, and colors right up to the stem. The vines are vigorous and healthy and produce heavy crops, the yield being as great as any variety we raise.

We regard this variety as one of the best medium early tomatoes for market or canning. Seed of our own growing from very choice fruit. **Oz. 50c; ¼ lb. \$1.50; lb. \$4.75.**

"I have grown John Baer tomatoes ever since it was introduced and think more of it each year and I want to say that the seed I got of you last year was the best I ever had. I sold over \$1,000 worth from 2,200 staked plants, and tomatoes were plentiful and very cheap in this section of the country."—W. O. Kindig, Medina, Ohio.

Marglobe Tomato

Another blight resistant tomato from the U. S. Department of Agriculture. The fruit is globe shaped, deep red and very smooth and uniform. The vines are vigorous and resist blight and other diseases to a remarkable degree. This tomato will be found very valuable where blight and "nail-head rust" or Septoria leaf spot is troublesome. It has proved to be a good canning variety. The seed we offer is of our own growing and from seed sent us by the U. S. Department of Agriculture. **Oz. 85c; ¼ lb. \$2.75; lb. \$10.00.**

TOMATOES—General Price List

The very earliest tomatoes are never quite as large and well colored as the later varieties, but Earliana of a carefully selected strain is the nearest perfect of any really early variety we know of. Harris' Extra Early Earliana is earlier than the old strain, and also colors better. John Baer is about a week later than Earliana, ripening with Bonny Best and has slightly larger fruit than that excellent variety. Chalk's Jewel is very similar to Bonny Best. Success is the heaviest yielding variety, quite similar to Stone, but ripens earlier.

Of the pink varieties, June Pink is the earliest and resembles Earliana, except in color. Early Detroit is a little later, but has large, smooth, well-colored fruit. Globe is a few days later and the fruit is as round as an apple. Ponderosa is very large, but irregular and does not color well around the stem and is not suitable for market. Trucker's Favorite is large, smooth and matures medium late.

	Oz.	¼ lb.	lb.
CANADIAN. The earliest variety. See page 31	\$.60	\$ 1.75	\$ 6.00
EARLIANA. Harris' Extra Early Strain. See description on page 31..	.50	1.50	5.00
MARVANA. New blight-resistant Earliana. See page 31.60	1.75	6.00
MARGLOBE. A very fine new globe variety. See above85	2.75	10.00
JOHN BAER. Large, smooth fruits, colors uniformly bright red all over. One of the best second early kinds.50	1.50	4.75

TOMATOES, General Price List (Continued)

	Oz.	¼ lb.	lb.
BONNY BEST. Very early, large, smooth and bright red with no green around the stem. See page 30.	\$.50	\$1.50	\$4.75
June Pink. Very similar to Earliana except as to color, which is pink like Beauty.	.50	1.50	5.00
EARLY DETROIT. A pink variety with smooth, evenly colored fruit of good size. A very fine pink tomato.	.40	1.20	4.00
Chalk's Early Jewel. Medium early, smooth and well colored.	.45	1.25	4.50
SUCCESS. Very fine main crop variety. Smooth, well colored and solid	.50	1.50	4.75
STONE. There is nothing finer than a first-class strain of Stone, but it ripens rather late for the most northern parts of the country. Seed of our own growing at Moreton Farm.	.45	1.25	4.50
Dwarf Stone. Plants like Dwarf Champion with fruit like Stone, very prolific and a valuable variety.	.60	1.75	5.50
Trucker's Favorite. Large, smooth, pink, medium late.	.40	1.20	4.00
Imperial. One of the best pink tomatoes for main crop.	.45	1.25	4.25
GLOBE. (Livingston's). As round as an apple; color deep pink. One of the very best varieties of this color.	.45	1.25	4.50
PONDEROSA. Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium early; does not color very well and is somewhat irregular.	.60	1.75	5.50
Crimson Cushion. Like Ponderosa but deeper color and smoother.	.60	1.75	5.50
Dwarf Champion. Early, pink, medium size, dwarf plant.	.45	1.25	4.50
Livingston Beauty. Large, late, pink, very smooth.	.35	1.10	3.75
Red Cherry. Very small red fruit in clusters.	.45	1.25	4.50
Yellow Plum. Plum shaped, small, yellow fruit.	.45	1.25	4.50
Red Plum. Small plum shaped fruit.	.45	1.25	4.50
Red Pear or Fig. Small pear-shaped red fruit.	.45	1.25	4.50
Yellow Pear. Small pear shaped yellow fruit.	.45	1.25	4.50
GOLDEN QUEEN. Large, smooth yellow fruit.	.45	1.25	4.50
Ground Cherry or Husk Tomato. Yellow fruit in husks.	.45	1.25	4.50
Superb Salad. Small, very smooth red fruit suitable for serving whole in salads. Very prolific.	.45	1.25	4.50

TURNIPS

Both the Purple Top and White Milan grow rapidly and are the first to mature. Purple Top Strap-leaf is very similar but a little later. Purple Top White Globe is a little later than Strap-leaf but a much better turnip and is the most popular variety for market. White Egg is a handsome white egg-shaped turnip, and Golden Ball a nice, smooth, round yellow variety which grows rapidly. Snowball is round and snow white. Yellow Stone is larger and more flat, while Yellow Aberdeen is globe-shaped and grows to a larger size, but is better suited for feeding stock than for market.

	Oz.	¼ lb.	lb.
EARLY WHITE MILAN. Very early, flat white turnip.	\$.10	\$.25	\$.70
EARLY PURPLE TOP MILAN. The earliest purple top turnip, very fine.	.10	.25	.70
PURPLE TOP WHITE GLOBE. Like Strap Leaf, but round instead of flat. Very fine fall turnip.	.10	.18	.50
Purple Top Strap-leaf. White, purple top, flat, very rapid grower.	.10	.18	.50
Snowball. Pure white, round as a ball; early, with small tops.	.10	.25	.65
White Egg. Pure white, globe shape.	.10	.20	.60
GOLDEN BALL. Round, smooth yellow. A fine turnip.	.10	.20	.60
Cowhorn. Long, white, green top.	.10	.20	.55
Yellow Stone. Very firm, flat, light-yellow, medium early.	.10	.20	.60
Yellow Aberdeen. Large, round yellow turnip; very firm and keeps a long time.	.10	.20	.60

RUTA BAGAS OR SWEDE TURNIPS

MACOMBER. A white purple top Swede of very fine quality for table use.	.30	.70	2.25
IMPROVED LONG ISLAND. A very fine strain of yellow Purple Top Ruta Baga. The roots are smooth and fine with very small neck and few side roots. The flesh is rich yellow and of fine quality.	.12	.30	1.00
PERFECTION SELECTED SWEDE. A fine selected strain of purple top yellow Swede. Grows large but is very smooth and of fine grain. One of the best yellow ruta bagas for market.	.10	.25	.75
Imperial Purple Top. Large, yellow, smooth and a heavy yielder.	.10	.25	.65
White Sweet or French. A good White Swede turnip with green top.	.10	.20	.60

HERBS FOR FLAVORING, Etc.

	Oz.	¼ lb.	lb.
Basil. Used for flavoring soups and sauces. Plant about 18 in. high...	\$.15	\$.45	\$1.50
Borage. Often used for bee pasture. Sow in spring in the open ground...	.20	.50	1.75

SAGE, Holt's Mammoth. The best sage. Doz. 75c. postpaid.....	3.50	30.00
BRUSSELS SPROUTS, Long Island Improved Dwarf. Ready June 20.....	.60	3.50
CABBAGE PLANTS. Early transplanted plants, ready April 15—May 15. Well hardened in cold frames and will stand considerable frost. Early Jersey Wakefield, Golden Acre, Copenhagen Market.....	1.25	10.00
Field grown plants, ready middle of June. All leading varieties.....	.40	2.50
CAULIFLOWER. Early transplanted plants ready from April 25 to May 15. Snowball.....	1.50	12.00
Field grown plants ready June 20. Snowball and Danish Giant.....	.75	4.50
CELERY. Early greenhouse grown plants ready May 15th. Golden Self Blanching.....	1.00	8.00
Field grown plants, ready last of June. Varieties: Golden Self Blanching, Golden Plume, French's Success, Giant Pascal, Easy Blanching.....	.50	2.50
PEPPERS. Strong transplanted plants, ready last of May. Harris' Early Giant, Ruby King, Harris' Earliest, Giant Crimson, Giant Cayenne.....	1.75	15.00
PEPPERS. Untransplanted Plants. These plants should be grown in frames for two or three weeks before planting in the open ground. Ready April 25 to June 1st. Same varieties named above. Weight packed for mailing, 100, 1 lb.; 1000, 4 lbs.....	.60	4.50
TOMATOES. Ready May 10 to June 25. Strong transplanted plants, well hardened. Extra Early Earliana, Canadian, John Baer, Bonny Best, Success, Stone, Ponderosa (pink).....	1.60	14.00
TOMATOES. Untransplanted Plants. These are taken direct from the seed bed and should be set in frames and allowed to grow for two weeks or more before setting in the field. They are strong, stocky seedlings 3 to 4 in. high. Ready April 10 to May 15th. Same varieties as named above. Weight packed for mailing, 100, 1 lb.; 1000, 5 lbs.....	.50	3.50

NOTE—Special prices will be made on orders for plants in considerable quantities placed early in the season so they can be raised especially for the order.

"The cabbage plants received surely are fine, every one healthy and the finest I ever had at this time of year."—Wm. Davidson, Zieglerstown, Pa., May 6, 1926.

HARRIS' FLOWER SEEDS

Our flower seeds are maintained at the same high standard of quality as our vegetable seeds. They are all tested for germination as well as carefully tried out in our extensive trial-grounds, where our customers are always welcome to come and inspect our stocks.

Harris' Crego or Ostrich-Feather Asters

ASTERS

Harris' Treated Aster Seed is the Best

In order for you to have a profitable crop of Asters it is necessary that we do our part by furnishing you with good seed of high germination, and the very best quality in the most desirable varieties.

Although we have been trying our best to give you seed with these qualifications, we are going still further and chemically treating our seed as a preventative against any of the diseases that may be carried on the seed. There is one destructive disease, often called a "blight," the spores of which are carried over on the seed, and our treatment is a preventative against this disease. Of course, we cannot guarantee your Asters against diseases they may acquire from your soil, but we do claim that the seed, after our treatment, is less liable to acquire other diseases than the same seed would if not treated.

We maintain an extensive testing garden for Asters where we compare all different varieties while growing side by side. In this way we carefully select the most desirable sorts. Many of the varieties are grown on Moreton Farm or especially grown for us nearby, where the quality of the crop can be carefully watched.

ASTERS

Moreton Pink Aster

Moreton Pink

W1025a—Without a question this is the finest bright-pink Aster. The color is a deep cerise, like the Paul Neyron Rose, and the only Aster of this color. The flower is of the Rochester or Crego type, very full double, with long twisted petals. This is one of our Moreton Farm specialties, and florists are finding it an indispensable variety. We have a limited supply of an especially fine strain for florists' use. The plants are more vigorous and with better stems. Tr. pkt. 50c; ¼ oz. \$1.50

W1025—We have another stock from our general crop which is of the same good quality as last year. The quality of the flowers is the same as our select strain, but the plants are not quite as vigorous. Tr. pkt. 25c; oz. \$2.00.

Heart of France

W1078—Also called "Sensation." It is the best "red" Aster for cutting and the most popular for the plant trade. The color is a bright garnet-red, and the flowers are large and double on robust plants. Our stock is true to type. Tr. pkt. 20c; oz. \$1.25.

Crimson Giant Asters

W1083—This is a large flowered "red" Aster of upright growth. The flowers are a very rich brilliant blood-red, very large and densely double. This makes a particularly effective Aster for bedding. Tr. pkt. 20c; oz. \$1.25.

Extra Early Express White

W1141—This is the earliest good white Aster. The large, fluffy flowers are of the Crego type and come into bloom a few days earlier than the Queen of the Markets. The plant is a good grower and if planted very early in rich soil, it will have good stems. Due to a very short crop we can offer the White only in limited quantity. Tr. Pkt. 25c; ¼ oz. 65c.

W1142—Extra Early Express Rose. A bright, clear, deep rose-pink. This is the best and earliest rose. Tr. Pkt. 30c; ¼ oz. 75c.

Queen of the Market Asters

The standard early and one which has been profitably grown for years. The flowers are full double, and of a type that makes a desirable flower for shipping. The White, Bright Rose and Purple are the three best colors.

W1204—Lavender.....	.15	.90	W1200—Variety Mixture.....	.10	.75

Royal or Early Branching Asters

An early Aster to follow up Queen of the Market. The flower and plant resemble the Late Branching in form and size, but blooms 2 to 3 weeks earlier. These are the largest and best of the early sorts.

	Tr. Pkt.	Oz.		Tr. Pkt.	Oz.

Crego or Ostrich Feather Asters

We have very carefully tried all of the different varieties of the fluffy or Crego types, and have selected the best of each color from the different Crego, Ostrich Feathered, and other similar sorts. These we have listed under the one head of "Crego or Ostrich Feather Asters." This gives us a list of the very best without the confusion of duplication. Our stocks are of the best and the percentages of germination are high.

"The Asters I raised from your seed have been a great pleasure to me. Queen of the Market were magnificent and now I am enjoying great big blossoms on my Royal plants. So many seeds in each paper."—Mrs. J. J. Strickland, Springville, Pa.

"Your seeds had the highest germinating power of any I received, though I bought from 10 or 12 leading firms. Your Moreton Delphinium and Hardy Carnation seemed to throw more plants than there were seed in the packages."—Howard Pyle, W. Chester, Penn.

ASTERS

Peerless Pink

W1055—Although one of the older varieties, Peerless Pink is still unsurpassed as an all-around, dependable light pink, and we have an exceptionally good strain. The color is a delicate shell-pink. The very mammoth, full-double flowers are borne on great long, stiff stems that keep the flowers well up from the ground. Its season is a few days earlier than Late Branching. Tr. Pkt. 25c; oz. \$2.00.

Ball's White

W1061—A large white Aster that has been popular with the florists. The flowers are supposed to be so full double that the petals appear to be so full double that the petals appear to be heaped on top of each other, and the stems stiff and non-lateral. Season same as Late Blanching. Tr. Pkt. 25c; oz. \$1.75.

New California Giants

A new race of mammoth-flowering Asters on immense, robust plants. The flowers are somewhat on the Crego type and are colossal in size. As they bloom very late, they should be started extra early.

1815—Dark Purple.....	.40	1.50
1810—Variety Mixture.....	.35	1.25

Peerless Pink Aster

Speaking of our Asters, Mr. Frank Tinkman of Campello, Mass., says, "They are the admiration of all our neighbors, and are a good advertisement for your seeds."

Late Branching Asters

The standard mid-season to late variety. Blooming a little later than Cregos, and remaining in flower a long time, the plants carry a wealth of bloom until late in the fall. The flowers are very large and have broad incurved petals and show no yellow centers. The plants are of branching habit and carry the flowers on long stems, often reaching two feet high. We offer very fine strains of the most desirable colors and would call your especial attention to "Peach Blossom." This is a good lavender-pink shade that has been found very desirable for market and our stock is exceptionally good.

W1607—Peach Blossom.....	.15	1.00			

Early Beauty Asters

Late blooming Asters from California that are quite distinct. The plants are exceptionally large and vigorous with very long, clean, non-lateral stems, making splendid flowers for late fall cutting. The full-double flowers have long incurved petals which make them almost globe-shaped. They hold up especially well after they are cut, and they come at a season when the prices are usually high.

The Early Beauty varieties are very much earlier than the Late Beauty, yet much later than the Late Branching sorts. They are early enough to be sure of blooming, and the long vigorous stems keep the flowers up off the ground during the usual fall rains.

W1901—White.....	.25	2.50			

Late American Beauties

The latest Aster grown. Exceedingly vigorous and resists the fall frosts, often blooming until the middle of November. The White is a little earlier than the other colors. These are pretty late for some locations unless planted in a sheltered place. They will do exceedingly well in the same locations where the outdoor Hardy Chrysanthemums bloom well.

Choice Mixture of Tall Varieties

W1000—This is a very carefully made mixture of the different varieties of tall branching Asters, such as Royal, Late Branching, Crego, etc. It is well-balanced as to colors and types. There are no dwarf or poor sorts in it and it is not a mixture of discards. It is all fresh seed of good germination. Tr. pkt 10c; oz. 75c; ¼ lb. \$2.50; lb \$10.00.

"Your Zinnias and African Marigolds took first prize at our fair last year. I thank you so much for your high class seeds."—Mrs. Fred Smith, Delphi, Ind.

"I have raised your Snow-on-the-Mountain for years and wouldn't consider a flower garden complete without a long row of it. The best filler I know of for bouquets of Zinnias or Dahlias."—Richard S. Dougan, Warrensburg, N. Y.

Asparagus Plumosus Nanus
6 mos. from seed

Asparagus (Ornamental)

These are the varieties so highly prized by the florists, surpassing the most delicate ferns in elegance of habit and delicacy of spray. Our seed is a fine strain of the correct type and of good germination.

It is very easy to raise Asparagus from seed by sowing in flats and keeping at a temperature of about 60°.

W2090—Plumosus Nanus. 30c per 100 seeds; \$2.25 per 1000 seeds; \$9.50 per 5000 seeds.

W2091—Sprengeri. \$1.00 per 1000 seeds; \$4.00 per 5000 seeds; \$7.00 per 10,000 seeds.

Bellis or English Daisy

The little double daisies usually sown in July for next spring sales with Pansies and Forget-Me-Nots. Will also bloom the first season if started early.

W2290—Variety Mixture.....	.25	1.25
W2300—Giant Marguerite Mixture. The ordinary type of double out-door Carnations. This is an especially good strain. Tr. pkt. 15c; oz. \$1.00.		

Harris' New Hardy Carnation

W2310—Mixed Colors. Here is a new carnation of our own growing that is actually hardy, yet will bloom the first spring if treated the same as Bellis, Pansies and Forget-me-Nots. These will give splendid plants to sell, potted or in clumps, for Decoration Day. They may be also started in January for selling in the spring as a hardy border plant. Tr. pkt. 35c; ¼ oz. \$1.60.

Cyclamen

The choicest of winter-blooming house plants and in great demand every winter. As the price is always high, they are sure to be a profitable crop to grow. If grown without check they should bloom freely in 15 months from sowing. Our seed is the best obtainable.

Harris' New Hardy Carnation

New Early Double Crested Cosmos, Pink

Centaurea

CYANUS OR DOUBLE BACHELOR'S BUTTONS. The new double Cornflowers or Bachelor's Buttons are proving very profitable as cut-flowers. We have a superior strain that is quite double and of clear colors. Our Double Blue is especially fine and desirable.

	Tr. Pkt.	Oz.
W2321—White. Without the blue eye	\$.10	\$.40
W2322—Rose. Pink shades	.10	.40
W2325—Blue. A favorite color		
	¼ lb. \$1.25	.10 .40
W2320—Variety Mixture of all colors		
	¼ lb. \$.75	.10 .25
W2350—GYMNOCARPA. The fine leaved "Dusty Miller" used for edging and porch boxes.	Tr. pkt.	
	10c; oz. 50c.	

**Centaurea Americana
or Basket Flower**

W2334—Lavender. This has proven to be one of the best out-door cut-flowers. It grows quickly from seed sown out-doors and the large, feathery blooms of delicate lilac are profusely borne on long stems throughout a long season. They make an excellent market flower, keeping well in water. Their characteristic of closing at night disappears after being kept a day or two in water. Tr. pkt. 15c; oz. \$1.00.

Cobea Scandens

W2572—Blue. A good blue-flowered vine to grow for the plant trade. Tr. pkt. 10c; 40c per oz.

Cosmos

Our Early Flowering Giant Cosmos is an especially fine stock and is true early and large flowering

	Tr. Pkt.	Oz.
W2451—White	\$.10	\$.40
W2452—Pink	.10	.40
W2453—Red	.10	.40
W2450—Mixed Colors	¼ lb. \$1.00	.10 .30

Early Flowering Double Cosmos are in great demand. Our strain is a large percentage early and double. It is the best we can procure.

	Tr. Pkt.	Oz.
W2461—White	\$.40	\$3.00
W2462—Pink	.40	3.00
W2463—Red	.40	3.00
W2460—Mixed Colors	.35	2.75

Coleus

W2510—Choice, large-leaved mixture. A mixture from the best large leaved varieties. Small pkt. 50c; large pkt. \$1.00.

W2511—Harris' Extra Fancy-Leaved Mixture. This is absolutely the finest strain of Coleus we have ever known. Large leaves in the brightest of colors. Small pkt. \$1.00; large pkt. \$2.00.

Dahlias

It is both easy and profitable as well as very interesting to raise Dahlias from seed. As a rule the seedling Dahlias make the best cut-flower proposition.

	Tr. Pkt.	Oz.
W2600—Double-Flowering	\$.30	\$ 4.00
W2603—Double Pompon	.35
W2604—Peony-Flowered	.25	3.00

Dracena

W2750—Indivisa. The popular center plant for vases, porch-boxes, etc. As the seed is sent out in berry, it should be rubbed out before planting. 10c per Tr. pkt.; 30c per oz.; \$1.00 per ¼ lb.

Didiscus (Blue Lace Flower)

W2746—Coeruleus. One of the new out-door cut-flowers. Lavender-blue, lace-like flowers on good stems and a profuse bloomer. Tr. Pkt. 20c; oz. \$1.00.

Grevilla (Silk Oak)

W3000—Robusta. A graceful and ornamental fern-like plant. Grows rapidly from seed. Tr. pkt. 10c; oz. 60c.

Gypsophila (Baby's Breath)

W2991—Elegans Alba Grandiflora. (Florists' Selected Strain.) A splendid large-flowered strain that is one of the most profitable to raise for the cut-flower market. The fine sprays of dainty white are in constant demand. Sow at 14 day intervals. Oz. 15c; ¼ lb. 50c; lb. \$1.25.

Gaillardia

W2900—Double Mixed Colors. Good yellow and red flowers for bouquets. Tr. pkt. 10c; oz. 50c.

W3650—Large Flowering Hybrids. A very pretty annual of beautiful colorings. Good for growing in a cool house, or sowing out-doors. Wonderful to use as a bedding plant. Tr. pkt. 30c; oz. \$3.00.

W3651—Blue Gem. A new variety that makes a splendid pot-plant or a pretty bedding plant. Dwarf plants with bright blue flowers. Tr. pkt. 35c; oz. \$4.00.

African Marigold, Orange Prince

PETUNIAS

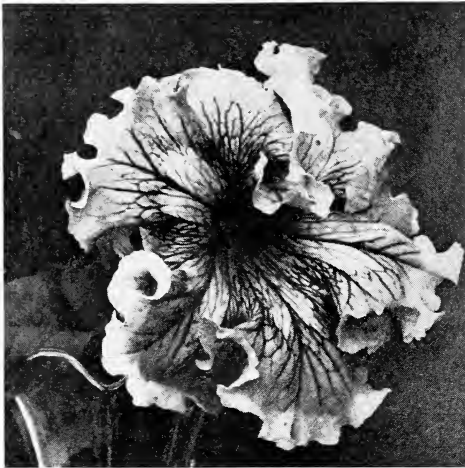

We have this year, what we believe to be the finest possible assortment of Petunias. We have tried a great many varieties and different strains from many different sources, and the Petunias offered in this list are the best we can obtain.

W3800—Harris' Perfection Double. Our strain of Double Petunia is exceptionally fine, coming 85% to 95% true double and the balance semi-double. The flowers are very large and in a splendid range of colors. This seed is grown especially for us by a Petunia expert and is the very best Double Petunia. 200 seeds 75c; 500 seeds \$1.25; 1000 seeds \$2.25.

W3801—Ruffled Giants or Giants of California. The best ruffled Petunias we can possibly obtain. Very large, single flowers with beautiful ruffled edges in many shades of color. 200 seeds 35c; 500 seeds 75c; 1000 seeds \$1.25.

W3803—Fringed Hybrids. These are beautiful single Petunias for bedding. The flowers are not so large as the Ruffled Giants, but are much larger than common Petunias and the edges are beautifully fringed. 500 seeds 20c; 1000 seeds 35c; 1-16 oz. \$1.50.

"Everyone to whom we carried flowers last summer wanted to know where we got the seed. The asters and sinias being especially fine. The two new asters 1037 and 1813 are certainly beautiful." Mrs. L. B. Siegfried, Richmond, Va., Box 1728.

Harris' Giant Ruffled Petunia, Quaker Lady

NAMED VARIETIES OF RUFFLED PETUNIAS

- W3814—Harris' Giant Ruffled Quaker Lady.** A splendid Petunia of immense size and wonderfully ruffled. The color is a delicate bluish-gray beautifully veined with network of deep blue. Uniform from seed. 200 seeds 45c; 500 seeds 85c; 1000 seeds \$1.50.
- W3815—Harris' Ruffled Triumph.** This splendid Petunia of recent introduction we consider the best pink Petunia. The color is a very bright shade of deep salmon-pink, while the flowers, though not exceptionally large are of the large ruffled type. It produces true to type from the seed. 200 seeds 35c; 500 seeds 70c; 1000 seeds \$1.25.
- W3811—Fringed Snow Queen.** A large well fringed white with a yellow throat. Very fine. 200 seeds 30c; 500 seeds 60c; 1000 seeds \$1.00.
- W3813—Fringed Titania.** A new color in fringed Petunias. Large rose-pink flowers with white blotches. Very striking. 200 seeds 35c; 500 seeds 70c; 1000 seeds \$1.25.
- W3810—Harris' Ruffled Variety Mixture.** A mixture of the four splendid varieties described above. This is sure to give you a good range of colors. 200 seeds 30c; 500 seeds 60c; 1000 seeds \$1.00.

Single Bedding Petunias

NEW BALCONY PETUNIAS

A new class of Single Bedding Petunias that is exceptionally fine for filling vases, porch-boxes, etc., or for bedding out. They are much more free-blooming and the flowers are larger and the colors are clearer and brighter than the old type of Bedding Petunias. The plants are taller and of a semi-trailing habit.

W3830—Mixed Colors.....	.15	.25

PRIMROSE

Primroses are one of the florists' most important flowers and some of each class should be grown. We have an exceptionally good mixture each of the most satisfactory varieties. They are all easily grown from seed if carefully sown. To insure more even germination it is well to soak the seeds 24 hours in water before sowing.

- W4020—Primula Veris Elatior.** (Polyanthus or Oxship). **Splendid Mixture.** This is the superb Polyanthus or Hardy Primrose for outdoor growing. Also good for pot culture. **Tr. pkt. 40c.**
- W4030—Primula obconica Grandiflora.** **Mixed Colors.** The Obconica Primrose are large flowering and the most free-blooming, making a splendid pot plant that is literally perpetual blooming. Seed sown early in spring will make fine plants for early winter. A fine mixture of all colors. **Tr. pkt. 60c.**
- W4050—Primula Sinensis Fimbriata.** (Fringed Chinese Primrose). **Splendid Mixture.** This is the old standby for greenhouse culture. Easily grown from seed and requiring but 7 months from date of sowing to bloom. Sow in March and a second sowing in May. Wide range of colors. **Tr. pkt. 65c.**
- W4021—Primula Polyanthus, Giant Munstead Yellow.** The best yellow hardy Primrose. Large trusses of big yellow flowers. Easy to raise from seed and perfectly hardy out-doors. **Tr. Pkt. \$1.00.**
- W4022—Primula Polyanthus, Giant Red.** A new large-flowering red hardy Primrose. Large trusses of bright red. Grows easily from seed. **Tr. Pkt. \$1.00.**

PANSIES

Each year we are improving the quality of our Pansy seed as we realize the importance of highest quality seed to the Pansy-plant grower and we feel sure that we are offering the highest grade Pansy seed for the lowest possible price.

Harris' Special Mixture

W3700—This is our own mixture that is especially made up from some of the very best varieties and choicest colors. We make a special point of this mixture as a medium priced mixture for the florists' plant trade. The flowers are all large, many of them ruffled and with bright colors predominating. Tr. Pkt. 25c; ¼ oz. 90c; oz. \$3.50.

Harris' "Best" Pansy Mixture

W3704—As the name implies, these are our BEST Pansies. The flowers are extremely large with the deep, velvety colors. A large percentage have fluted or ruffled petals. Our mixture this year is superior to any pansies we have ever had and our price for this quality of Pansies is very low. Tr. pkt. 40c; ½ oz. 85c; ¼ oz. \$1.60; oz. \$6.00

Masterpiece Mixture or Giant Ruffled

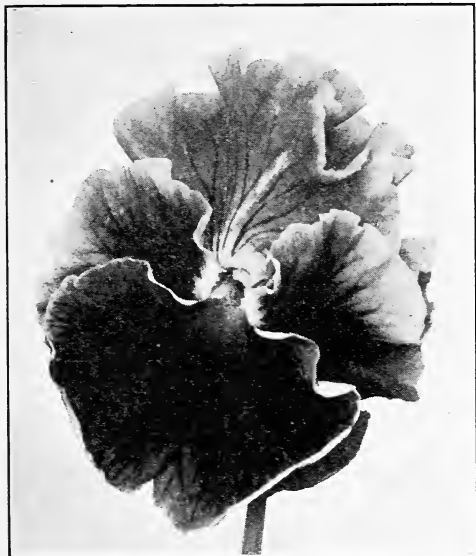

W3702—The flowers of this mixture have fluted or ruffled petals which adds much to the beauty of the wonderfully rich colors. This stock may be depended upon to be well ruffled. Tr. pkt. 30c; ½ oz. 60c; ¼ oz. \$1.10; oz. \$4.00.

Giant Trimardeau

W3701—Mixed Colors. We make this high grade mixture by mixing together proportionate quantities of choicest colors of the large-flowering Trimardeau Pansies. This assures you of a mixture well balanced as to color and of large flowers. Tr. pkt. 20c; ¼ oz. 40c; oz. \$1.50.

Named Varieties of Choice Pansies

	Tr. pks.	Oz.
W3731 —Snowflake. (Trimardeau). A fine, large-flowering, pure white.....	\$.20	\$1.25
W3732 —Golden Yellow. (Trimardeau). A clear yellow of good size and form.....	.20	1.50
W3733 —Giant Vulcan. (Masterpiece). A new and beautiful red Pansy. The flowers are large, of heavy substance, and very well ruffled. The color is a bright brown-red. This is a Pansy of unusual color and quality.....	.50	5.00
W3734 —Blue Shades. (Trimardeau). A mixture of large-flowering Pansies of the different shades of bright blue.....	.15	1.00
W3735 —Red Shades. (Trimardeau). Large-flowering varieties in the different attractive shades of red and brown.....	.20	1.50
W3737 —Giant Purple. (Masterpiece). A giant frilled, dark-purple of splendid quality and color.....	.35	4.00
W3727 —Giant White-Blotch. Large wavy white flowers with a large bright blue blotch on each petal. A very showy bedder.....	\$.35	\$ 4.00
W3728 —Blue Domino. Large clear, bright blue. Good to use in combination with white or yellow.....	.25	2.00
W3729 —Cardinal. A splendid bright mahogany-red. Large wavy flowers.....	.30	2.50

Masterpiece Pansy

"Wish to say that I have the best Asters from your seed that I ever raised."—A. W. White, Washington, Mich.

"My flowers have been fine. Such beautiful Zinnias, and in fact all the seeds came fine."—Mrs. A. McClure, Richville, N. Y.

"I have had such success with your Aster seeds that I am renewing my order again this year. They are splendid healthy stock, and with me are free from blight."—Mrs. C. C. Wingate, Amityville, L. I.

Tufted Pansies

(Viola Cornuta)

A wonderful class of Pansies for summer bedding, especially in positions where the large-flowering types would suffer from droughts. The flowers are not as large but they bloom profusely throughout, and the colors are clear and bright. Our varieties are the largest-flowering or hybrid types.

	Tr. Pkt.	Oz.
W3761 —Snowdon. White.....	\$.25	\$3.50
W3762 —Rose. Rose-pink.....	.25	3.50
W3763 —Yellow.....	.20	3.00
W3764 —Admiration. Blue.....	.25	3.50
W3760 —Variety Mixture.....	.20	3.00

Statie Sinuata

An everlasting flower that is easily grown and is a splendid cut-flower. We have two new and especially fine large-flowering varieties this year.

	Tr. Pkt.	Oz.
W6172 —Superb Rose.....	\$.15	\$.75
W6173 —Royal Blue.....	.15	.75
W6170 —Mixed Colors.....	.10	.65

SCABIOSA

The annual Scabiosa are one of the very best propositions to raise for the late summer and fall cut-flower market. As they are not injured by frost, they bloom after other out-door flowers are gone.

	Tr. pkt.	Oz.
W4651 —Snowball. White.....	\$.10	\$.50
W4653 —Rose. Pink.....	.10	.50
W4654 —Azure Fairy.....	.10	.50
W4655 —Ageratum Blue.....	.10	.50
W4658 —Purple. Dark maroon.....	.10	.50
W4659 —Fire King. Bright red.....	.10	.50
W4650 —Variety Mixture.....	¼ lb. \$1.50	.10 .40

Two New Giant Scabiosa

These two new varieties have much larger flowers than the other kinds and would be especially desirable as cut-flowers.

	Tr. Pkt.	Oz.
W4648 —Shasta. White.....	\$.20	\$3.00
W4649 —Peach Blossom. Pink.....	.20	3.00

SALVIA

There is no other bedding plant so much in demand as Salvia, and a good even stand of Salvia is always appreciated. Our own strain of New England Grown Bonfire Salvia has all the qualities necessary to please your customers.

	Tr. pkt.	Oz.
W4600—Bonfire. This is our own special strain grown in New England for a number of years and thoroughly acclimated to this latitude. It grows evenly as to height and is the earliest to bloom, every plant coming into bloom at the same time.	.25	\$2.50
W4601—Splendens. Later blooming and taller growing than Bonfire.	.20	1.50
W4602—Zurich. A low growing variety often preferable for edging.	.50	4.00
W4604—America. A strain similar to Bonfire but not as tall growing.	.40	3.00
W4603—Farinacea. Blue Salvia. A new light-blue Salvia that makes a wonderful cut-flower and a splendid bedding plant. Treat plants same as Salvia Splendens. Will bloom continually from mid-summer until winter, not being injured by frosts.	.25	2.50

Snow-on-the-Mountain

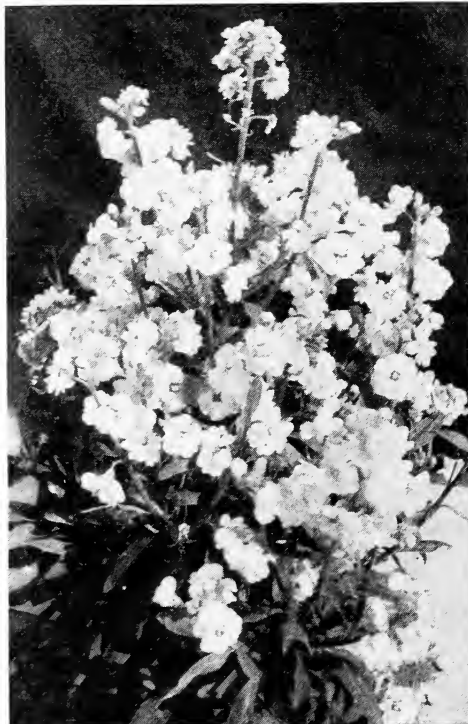

W5192—Euphorbia Variegata. Makes a good plant to grow out-doors for cut-flowers. The white-edged leaves are splendid to mix in bouquets. Tr. pkt. 10c; Oz. 30c.

STOCKS

Double Mammoth Flowering Beauty

We have given our Stocks very careful consideration and find that this strain is the most satisfactory for outdoor blooming. The branching plants grow about 2 feet high and are covered with long sprays of sweet-scented, double flowers.

	Tr. pkt.	Oz.
W6001—Snowdrift. Pure white.	.25	\$2.50
W6002—Beauty of Nice. Flesh pink.	.20	2.00
W6003—Chamois. Attractive rose pink suffused with gold.	.30	3.00
W6004—Canary Yellow. Clear yellow.	.25	2.50
W6005—Lavender. The best blue.	.25	2.50
W6000—Mixed Colors. A well proportioned mixture of all the above sorts.	.20	2.00
W6006—Bright Red. New Color.	.30	3.00
W6007—Belle of Naples. Old Rose pink	.30	3.00

Snowdrift Stocks

SNAPDRAGONS
New Giant-Flowering Snapdragons

Antirrhinum Maximum
These are not only the largest-flowered Snapdragons grown, but they have the largest and most vigorous plants. The unusual colors are exceedingly rich and attractive. The individual flowers are immense and the spikes are long. They are unexcelled for either a plant trade or cut-flowers, indoors or outdoors.

Price of the following: Tr. pkt. 15c; ¼ oz. 40c; oz. \$1.50.

- W5001—Cerberus. Deep carmine-rose with yellow lip and white throat.
- W5002—Gotelind. Brilliant light orange. A magnificent cut-flower.
- W5006—Maralda. A bright, brilliant rose that is most attractive.
- W5007—Snowflake. Pure white.
- W5004—Purple King. Dark rich velvety purple.
- W5009—Canary Bird. Clear, bright yellow.
- W5003—Defiance. A splendid deep wall-flower-orange.
- W5008—Fascination. A new large deep flesh-pink.
- W5005—Tuft of Lilacs. Large flowers in shades of lavender, orchid, lilac and light violet.
- W5000—Variety Mixture. A splendid mixture of all the above. Tr. pkt. 15c; ¼ oz. 35c; oz. \$1.25.

Half-Dwarf Snapdragons

These Improved Large-Flowering Snapdragons grow to a medium height and are much better for some uses than the tall-growing giant varieties. They make more compact plants and flower much more abundantly. The following are the leading florists' colors:

	Tr. pkt.	Oz.
W5101—Purity. Pure white.	.15	\$1.00
W5104—Philadelphia Pink. Pure pink.	.20	2.50
W5106—Golden Queen. Clear Yellow.	.15	1.00
W5103—Nelrose. Coral Pink.	.15	1.50
W5105—Firebrand. Bright Red.	.15	1.00
W5100—Variety Mixture. A well-balanced mixture made up from many choice named varieties.	.15	\$1.00

Tall Large Flowering Snapdragons

W5030—Variety Mixture. A splendid mixture composed of separate colors of these fine, tall-growing Snapdragons. The flowers are not as large as the New Giant Flowering, but they flower more profusely. Tr. pkt. 15c; oz. 75c.

SMILAX

W4950—This is the Smilax all florists use to put with cut-flowers. It is easily grown from seed sown in February. They will then be ready for 3-in. pots in May and can be planted in solid beds in July. 30c per oz.; \$1.00 per ¼ lb.

SOLANUM (Jerusalem Cherry)

W5170—Cleveland Cherry. An easily grown and profitable as well as a popular pot plant. The bright red berries of this little tree-like plant are borne in great profusion on the upper side of the branches and above the bright green leaves. This makes it far more desirable than the ordinary varieties. Tr. pkt. 20c; oz. \$1.50.

SWEET PEAS

We have added many of the newest varieties of Sweet Peas this year, in both Early and Late Flowering sorts. All these varieties have been carefully tested in our trial grounds and we consider that we have the best possible selection of varieties and at as low a price as possible. One-half ounce will be supplied at the ounce rate.

New Early Flowering Sweet Peas

These new Winter or Early Flowering Sweet Peas are the best for forcing under glass or for early flowering outdoors. We have carefully selected the best varieties in each color, all with large Spencer type flowers and good clear colors.

	Oz.	½ lb.

Wallflower

W8070—Paris Extra Early. Mixed colors. Will bloom if treated like Stocks. Tr. Pkt. 15c; Oz. \$1.20.

ZINNIAS

Good Zinnias are one of our specialties and we give them a great deal of attention in an effort to have the best Zinnias. We have some new Zinnias this year that are well worth your growing.

We would ask you to remember that, in spite of all we can do Zinnias will not come 100% true to type. The Large Flowering Double is an older strain and consequently the colors are more firmly established, although some shades are almost impossible to hold true. The new Dahlia-flowered and Giant varieties are necessarily somewhat variable in type and color. We say this so that you will not be disappointed if all the flowers are not perfect. Our stock is the very best we can produce. It is also true that season and soil conditions influence the characteristics of the flowers.

Harris' Double Giant Zinnias

A new strain of Zinnias that are of immense size and very double. The centers are small and not conical shape and the petals more loosely placed than in the Dahlia-Flowered. This gives the flowers a more graceful and less stiff appearance. The plants are tall and vigorous and very prolific.

	Tr. pkt.	Oz.
W8125—Lemon Queen. Of immense size and pleasing yellow color	\$.20	\$2.00
W8126—Orange King. A mammoth flower the shade of Orange Calendula20	2.00
W8127—Rose Queen. Giant flowers of bright rose shades20	2.00
W8124—Purity. An immense tall-growing pure white20	2.00
W8123—Enchantress. Very large bright carmine rose20	2.00
W8100—Variety Mixture. A wonderful mixture of these mammoth Double Giant Zinnias made up of the above named colors	1/4 lb. \$5.00	.15 1.50

Giant Double Dahlia Flowered Zinnias

Another new type of mammoth flowering Zinnia from California, and we have added several new varieties to our list this year. These are the grandest Zinnias we are able to get. The plants are tall growing and the stems long, while around the center of the flowers the petals tend to be tubular, resembling a Dahlia of the "show" type. They make wonderful exhibition Zinnias.

	Tr. pkt.	Oz.

SEEDS OF HARRIS' HARDY PERENNIALS

We are large growers of the choicest varieties of hardy perennial plants and seeds and, with very few exceptions, all of the seed offered is of our own growing and all is good fresh seed of the highest germination. The seeds of most perennials do not retain their vitality for very long, while many varieties, even at their best, germinate very slowly, so for that reason it is best to sow only the freshest and best seed.

HARRIS' TREATED GLADIOLI BULBS

All of our bulbs have been chemically treated against the "hard rot" or "dry-rot" disease which has been infecting so many bulbs. This treatment assures you against losses from this cause.

Our list is very carefully selected from the innumerable varieties on the market and represents the most desirable sorts for the florists' use. This point is very important, because there are so many sorts on the market, although they might be very beautiful, yet for some reason do not prove to be adaptable to florists' use.

For our novelties and other varieties, see our General Retail Catalogue. Here we have some exceptional kinds worth trying and we will be pleased to allow you a special wholesale discount of 15% on any variety listed there and not offered here. Our Bulbs are of our own growing and are all good well-cured, full-sized bulbs, free from disease.

Size of Bulbs: 1st Size, 1½ in. or over in diameter; 2nd Size, 1¼-1½ in.

	1st Size		2nd Size
	Per 100	Per 1000	Per 1000
Alice Tiplady. (Prim.) The popular orange-colored Primulinus.....	\$ 4.80	\$42.00	\$35.00

Primulinus Hybrids. A fine mixture of named varieties.....	3.00	25.00	20.00

Special Wayside Mixture for Roadside Stands

We have had a great deal of call for a mixture that is especially desirable to grow for cut-flowers to sell at roadside stands and still be cheap enough so that the flowers can be sold profitably. To meet this demand we have made up a special mixture of the best varieties for cutting for this class of trade and selected them to cover a range of the most popular colors and including both early and late kinds.

The bulbs are not all of the largest size, but they are all large enough to give excellent bloom. Correct proportions of the following varieties are used: Halley, Norton, Kirtland, Schwaben, Lily White, Tiplady, Yellow Hammer, Herade, Governor Hanley, Peace, Mrs. Watt, Le Marechal Foch, Louise and Crimson Glow. Wayside Mixture—\$2.50 per 100; \$12.00 per 500; \$22.00 per 1000.

Insecticides and Fertilizers, Etc.

TOBACCO DUST. Used extensively for dusting plants to destroy or repel bugs and plant lice. For fumigating greenhouses the tobacco dust we sell is most excellent. It burns evenly and will light without the use of kerosene. Five pounds will fumigate a house 20 x 100 feet. 5-lb. package 50c; 10 lbs. 75c; 50 lbs. or more at 5c per lb.

BLACK LEAF 40. 40 per cent Nicotine. A very effective insecticide for aphids, "lice" and all soft-bodied insects, such as rose aphid, apple tree aphid, etc. It is so concentrated that one part to 500 or 1000 parts of water makes an effective spray, costing less than two cents per gallon. Directions for use are printed on the can. 1 ounce bottle 35c; ½ lb. tin \$1.25; 2 lb. tin qt. \$3.50; 10 lb. tin \$13.50.

FORMALDEHYDE, 40 per cent. A valuable disinfectant for destroying germs that cause diseases in plants. It is very effective when used to destroy smut germs in oats and scab on potatoes. To treat oats use 1 pound (pint) formalin to 50 gallons of water and soak for ten minutes. For potatoes use 1 lb. to 50 gallons of water and soak two hours. In one-pound cans 35c per can; 6 cans \$1.80.

PULVERIZED SHEEP MANURE. This is an excellent fertilizer for all crops. It is rather costly to use on a large scale but for small gardens and especially for greenhouses and frames it can be used to great advantage. It not only furnishes actual plant food but also humus which is not supplied by chemical fertilizers. This is high grade material. There is no straw or other rubbish in it. It is pure dried and pulverized sheep manure. Use about 1 lb. to 4 or 5 square feet of surface.

		Price		
10 lb. bag	\$.60	100 lb. bag	\$ 2.50
50 lb. bag	1.50	1000 lbs. 10 bags	22.50

NITRATE OF SODA. Gardeners should always have some nitrate of soda on hand and use it whenever they want to promote a quick, strong growth in plants. A little nitrate dissolved in water at the rate of about a tablespoon 1 oz. to 2 gallons of water will stimulate a rapid growth either when applied to plants in frames, greenhouses or the open ground. If your plants don't grow well, try nitrate on them—but don't use too much. 10 lbs. 65c; 50 lbs. \$2.50; 100 lbs. \$4.50; 200 lb. bag \$8.50.

BONE MEAL. This is one of the best fertilizers for gardens, lawns, shrubs, fruit trees, etc. It is perfectly harmless and can be used with safety in any quantity desired. The plant food in bone meal is not immediately available so its benefit extends over a longer time than is the case with other fertilizers that are more soluble.

This bone meal is raw bone finely ground and contains 4% per cent ammonia, nitrogen and 50 per cent phosphate of lime. 10 lbs. 60c; 50 lbs. \$2.25; 100 lbs. \$4.00. Bags of 167 lbs. \$5.00 per bag.

Lowest prices will be quoted on large lots at any time.

Pot Labels and Garden Stakes

Keep a record of the kind and variety of seeds sown, dates, etc. Every gardener should use stakes and labels.

Pot Labels	Plain		Painted		Garden Stakes	Plain		Painted	
	100	1000	100	1000		100	1000	100	1000
4 in. long	\$.20	\$1.30	.25	\$1.70	12" long, 1 1/4" wide	\$1.25	\$9.40	\$1.50	\$11.00
5 in. long	.22	1.60	.28	2.10	These are nice, smooth, white wooden labels of best quality. Weight for mailing: Pot labels 3 lbs. per 1000; Garden stakes 2 lbs. per 1000.				

GARDEN LINE. Good strong hemp garden line. 50 feet 50c; by mail 55c; 100 feet 75c; 200 feet \$1.25. Weight 1 lb. per 100 feet.

RAFFIA. Used for tying bundles of plants, for staking plants to stakes, for budding and grafting, and many other purposes. It is very economical as it costs less than string. 1 lb. 25c; 10 lbs. or more 15c per lb.

TAR PAPER PADS. Slipped around the stems of cabbage and cauliflower plants after they are set out to protect from the cabbage maggot. Price, 100 pads 40c; 1000 pads \$2.50; 5000 or more \$2.00 per 1000.

"Auto Spray" No. 1

This is the most convenient hand sprayer we know of. We use it on our own farm and can highly recommend it. In construction and workmanship it is superior to other similar sprayers.

To Operate. Remove pump with a half turn. Fill tank two-thirds full of solution. Replace pump and with a few strokes compress air on solution.

Then direct the spray. Two pumpings will discharge contents.

Uses. For spraying trees, shrubs, vines, field crops, greenhouses and country houses; for applying Paris green, arsenate of lead, bordeaux lime and sulphur emulsions, disinfectants, kerosene, oil, whitewash, cold water paints, etc.

Special Features: Strength, simplicity and balanced construction, a nozzle which does not and cannot clog, and the only clog proof nozzle on a compressed air sprayer, no matter what competitors claim, has automatic shut-off device (Auto-Pop) which saves the solution and operates without fatigue, spreader to prevent wrinkling leather cup, thin parts malleable, and hose of extra quality. Remove nozzle to get solid stream.

EQUIPMENT: Carrying sprayer, 2 ft. 3/4 in. hose, fine spray nozzle and stopcock or Auto-Pop as ordered.

Auto-Pop No. 1—Patented automatic shut-off. To stop the flow of solution it is necessary only to release the fingers.

Extension Pipe—Brass, 2 ft. length. Connects direct to the shut-off. Three lengths generally used for trees.

SPECIAL EQUIPMENT:

Brass Elbow—For reaching the under side of leaves or spraying at an angle.	
Auto-Spray No. 1B—Brass tank with auto-pop	\$8.75
Auto-Spray No. 1D—Galvanized tank with auto-pop	6.00
Extra Extension pipe 2 ft. length brass each	.50
Elbow for extension brass	.35

Weight of Auto-Spray No. 1 packed for mailing is 11 lbs. Please add postage if to be sent by parcel post.

For other tools, etc., see our general catalogue

One More Chance for the Seed

Last spring when planting a five acre piece of sweet corn we treated one peck (enough for the one acre) out of the bag with Semesan dust. The seed was all of high germination and vitality, but the weather was so cold and wet that it was three weeks before the corn sprouted. About half of the untreated seed came up, but practically 100% of the treated seed grew. The corn on the treated acre grew more uniformly, matured a few days earlier and the crop was about double any similar size block in the patch. The Semesan for the above treatment cost but 30c. We believe treating corn and beans with Semesan before planting is *cheap and easy insurance*.

"Damping Off" Stopped. For the last two years we have found that watering the soil in the greenhouses and frames with a weak solution of Semesan *stops damping off*.

We are able to offer Semesan this year in three forms:

Semesan. Can be applied in either liquid or dust form to prevent and control a great variety of parasite diseases and fungoid growths borne by seeds, seed pieces, plants and soils. We have found dusting with Semesan effective in raising the germination of certain seeds. We used Semesan with excellent results in treating gladiolus bulbs for black rot.

Semesan Jr. A less expensive but equally effective form of Semesan for dry dusting both field and sweet corn seed.

Semesan Bel. Applied to whole or cut seed potatoes, either as a dry powder or whitewash like water mixture. Semesan Bel will prevent or control the common seed borne potato diseases.

Prices of Du Pont Semesan		Semesan Jr.		Semesan Bel	
2 oz.....	\$.50	1 lb.....	\$ 2.75	1 lb.....	\$ 1.75
8 oz.....	1.60	5 lb.....	13.00	5 lb.....	8.00
25 lb.....			62.50	25 lb.....	37.50
